"You Brought a New Kind of Love to Me" is a 1930 popular song. The credits list music and lyrics as written by Sammy Fain, Irving Kahal, and Pierre Norman.Since Fain was primarily a music writer and Kahal a lyricist, it may be assumed that the music was by Fain and lyrics were by Kahal, with Norman's contribution uncertain.

"When Ren moves to Ava's city, he feels lost without the green and magic of his home, but not everything in the city is what meets the eye and Ren discovers that nothing makes you feel at home quite like a friend"--JcProvided by publisher.

The horrific and astonishing true story of the double life of Russell Williams, who was at once a respected figure in the Canadian military and a ruthless sado-sexual serial criminal and murderer. A model officer and elite pilot, Colonel Russell Williams was trusted with flying international dignitaries including Queen Elizabeth, as well as commanding Canada's most important military airbase. Yet his dark and violent secret life included breaking into 83 homes of girls and women; thefts of vast amounts of lingerie (which he dressed in); two bizarre sexual assaults that left an uncomprehending Ontario village on a knife's-edge; and eventually, two rape-murders. In A New Kind of Monster, veteran Globe and Mail crime reporter Tim Appleby chronicles a true story that could have been lifted from the darkest pages of pulp fiction, one that offers fascinating--and troubling--insights on human psychopathology.

A generation of children forced to live without words. It begins as a statistical oddity: a spike in children born with acute speech delays. Physically normal in every way, these children never speak and do not respond to speech; they don't learn to read, don't learn to write. As the number of cases grows to an epidemic level, theories spread. Maybe it's related to a popular antidepressant; maybe it's environmental. Or maybe these children have special skills all their own. The Silent History unfolds in a series of brief testimonials from parents, teachers, friends, doctors, cult leaders, profiteers, and impostors (everyone except, of course, the children themselves), documenting the growth of the so-called silent community into an elusive, enigmatic force in itself--alluring to some, threatening to others. Both a bold storytelling experiment and a propulsive reading experience, Eli Horowitz, Matthew Derby, and Kevin Moffett's The Silent History is at once thrilling, timely, and timeless.

More American women are childless than ever before--nearly half those of childbearing age don't have children. While our society often assumes these women are "childfree by choice," that's not always true. In reality, many of them expected to marry and have children, but it simply hasn't happened. Wrongly judged as picky or career-obsessed, they make up the "Otherhood," a growing demographic that has gone without definition or visibility until now. In Otherhood, author Melanie Notkin reveals her own story as well as the honest, poignant, humorous, and occasionally heartbreaking stories of women in her generation--women who expected love, marriage, and parenthood, but instead found themselves facing a different reality. She addresses the reasons for this shift, the social and emotional impact it has on our collective culture, and how the "new normal" will affect our society in the decades to come. Notkin aims to reassure women that they are not alone and encourages them to find happiness and fulfillment no matter what the future holds. A groundbreaking exploration of an essential contemporary issue, Otherhood inspires thought-provoking conversation and gets at the heart of our cultural assumptions about single women and childlessness.

An exciting new critical voice explores what it is that makes great art great through an illuminating analysis of the world's artistic masterpieces.

The history of life on Earth is, in some form or another, known to us all--or so we think. A New History of Life offers a provocative new account, based on the latest scientific research, of how life on our planet evolved--the first major new synthesis for general readers in two decades. Charles Darwin's theories, first published more than 150 years ago, form the backbone of how we understand the history of the Earth. In reality, the currently accepted history of life on Earth is so flawed, so out of date, that it's past time we need a 'New History of Life.' In their latest book, Joe Kirschvink and Peter Ward will show that many of our most cherished beliefs about the evolution of life are wrong. Gathering and analyzing years of discoveries and research not yet widely known to the public, A New History of Life proposes a different origin of species than the one Darwin proposed, one which includes eight-foot-long centipedes, a frozen "snowball Earth", and the seeds for life originating on Mars. Drawing on their years of experience in paleontology, biology, chemistry, and astrobiology, experts Ward and Kirschvink paint a picture of the origins life on Earth that are at once too fabulous to imagine and too familiar to dismiss--and looking forward, A New History of Life brilliantly assembles insights from some of the latest scientific research to understand how life on Earth can and might evolve far into the future.

Veteran historian Robert Tracy McKenzie offers a concise, clear, and beautifully written introduction to the study of history. Laying out necessary skills, methods, and attitudes for historians in training, this resource is loaded with concrete examples and insightful principles that show how the study of history--when faithfully pursued--can shape your heart as well as your mind.
