This market-leading textbook gives an authoritative account of international criminal law, and focuses on what the student needs to know - the crimes that are dealt with by international courts and tribunals as well as the procedures that police the investigation and prosecution of those crimes. The reader is guided through controversies with an accessible, yet sophisticated approach by the author team of four international lawyers, with experience both of teaching the subject, and as negotiators at the foundation of the International Criminal Court and the Rome conference. It is an invaluable introduction for all students of international criminal law and international relations, and now covers developments in the ICC, victims' rights, and alternatives to international criminal justice, as well as including extended coverage of terrorism. Short, well chosen excerpts allow students to familiarise themselves with primary material from a wide range of sources. An extensive package of online resources is also available.

Third revised edition.

This textbook explores international criminal law and its application to domestic prosecutions of international crimes.

This title covers the history, nature, and sources of international criminal law; the *ratione personae*; *ratione materiae* - sources of substantive international criminal law; the indirect enforcement system; the direct enforcement system; and much more.

The author offers an overview of the most important topics and developments in international criminal law, which are essential to everyone studying and practicing ICL.

This book is about the International Criminal Court (ICC), a new and highly distinctive criminal justice institution with the ability to prosecute the highest-level government officials, including heads of state, even in countries that have not accepted its jurisdiction. The book explores the historical development of international criminal law and the formal legal structure created by the Rome Statute, against the background of the Court's search for objectivity in a political global environment. The book reviews the operations of the Court in practice and the Court's position in the power politics of the international system. It discusses and clarifies all stages of an international criminal proceeding from the opening of the investigation to sentencing, reparations, and final appeals in the context of its restorative justice mission. Making appropriate comparisons and contrasts between the international criminal justice system and domestic and national systems, the book fills a gap in international criminal justice study.

Drawing on the critical legal tradition, the collection of international scholars gathered in this volume analyse the complicities and limitations of International Criminal Law. This area of law has recently experienced a significant surge in scholarship and public debate; individual criminal accountability is now firmly entrenched in both international law and the international consciousness as a necessary mechanism of responsibility. *Critical Approaches to International Criminal Law: An Introduction* shifts the debate towards that which has so far been missing from the mainstream discussion: the possible injustices, exclusions, and biases of International Criminal Law. This collection of essays is the first dedicated to the topic of critical approaches to international criminal law. It will be a valuable resource for scholars and students of international criminal law, international law, international legal theory, criminal law, and criminology.

International Criminal Law in Context provides a critical and contextual introduction to the fundamentals of international criminal law. It goes beyond a doctrinal analysis focused on the practice of international tribunals to draw on a variety of perspectives, capturing the complex processes of internationalisation that criminal law has experienced over the past few decades. The book considers international criminal law in context and seeks to account for the political and cultural factors that have influenced – and that continue to influence – this still-emerging body of law. Considering the substance, procedures, objectives, justifications and impacts of international criminal law, it addresses such topics as: • the history of international criminal law; • the subjects of international criminal law; • transitional justice and international criminal justice; • genocide, crimes against humanity, war crimes and the crime of aggression; • sexual and gender-based crimes; • international and hybrid criminal tribunals; • sentencing under international criminal law; and • the role of victims in international criminal procedure. The book will appeal to those who want to study international criminal law in a critical and contextualised way. Presenting original research, it will also be of interest to scholars and practitioners already familiar with
