~~The life cycle of animals - BBC Bitesize~~

When I teach life cycles, I like to teach the butterfly, frog, chicken, and plant life cycles one after the other. I encourage the kids to make connections between the different life cycles so that they understand the "big idea" that all living things grow and change. I start off the unit by having the kids each bring in a baby photo.

~~Ideas for a Life Cycles Unit - Learning at the Primary Pond~~

During its life cycle, an organism goes through physical changes that allow it to reach adulthood and produce new organisms. Since these changes are common within a species, they can be grouped into stages of development. The unit Life Cycles addresses the life cycles of plants and animals, including humans.

~~Science A-Z Life Cycles Grades 3-4 Life Science Unit~~

Life Cycle of an Animal: Animals start from eggs or live birth, then they grow up and mate. Animals begin life either from an egg or as a baby that is born ready for life. Baby animals grow and change into adolescents and eventually become adults. Adult animals look for a mate to begin the life cycle all over again with new babies.
