"Alice Sullivan, a high-achieving architect and mom of two, is used to being in control--until life rips the blueprints right out of her hands. While she's always strived for a picture perfect life, Alice's foundation is rocked when she discovers her daughter is failing reading at school, and worse, her son is a bully, having humiliated a classmate on stage in front of 500 of their peers. Alice feels desperate to make things right, but when she turns to her friends for support, she discovers her own social standing has eroded now that she's one of 'those moms' who can't control her kids"--

this astonishingly inventive new book (that even turns upside down for several pages!), you'll never look at being bored the same way again. Let's face it: everyone knows that car rides can be boring. And when things get boring, time slows down. In this book, a boy feels time slowing down so much that it starts going backward--into the time of pirates! Of princesses! Of dinosaurs! The boy was just trying to get to his grandmother's birthday party, but instead he's traveling through Ancient Egypt and rubbing shoulders with Ben Franklin. When time flies, who knows where--or when--he'll end up.

which fledgling family bonds are threatened by new love. Sixteen-year-old Elijah is completely mellow and his 23-year-old brother Danny is completely not, so it's no wonder they can barely tolerate one another. So what better way to repair their broken relationship than to trick them into taking a trip to Italy together? Soon, though, their parents' perfect solution has become Danny and Elijah's nightmare as they're forced to spend countless hours together. But then Elijah meets Julia, and soon the brothers aren't together nearly as much. And when Julia suddenly decides that maybe it's Danny she's really interested in, Danny has a decision to make: does he honor his relationship with the brother he thinks hates him, or does he follow his heart, which sorely needs some repairing of its own? Elijah and Danny don't think they have anything in common except their parents. Danny thinks Elijah is a lazy, slacking, clueless

Are We There Yet? is a collection of essays grouped around three major themes: the collapse of the American empire; the question of individual identity; and some thoughts regarding the nature of a post-collapse world. The book analyzes what has gone wrong with the United States since its inception, and the problems we now face as a result. It discusses the elements of a healthy human identity--elements that are largely absent from the American scene. And it poses alternatives to all of this, models already present in the consciousness of a few, and which, post-collapse, may possibly be

realized several decades down the line. In the course of this discussion, the author reviews the pathology of smart phones and related electronic gadgets; the phenomenon of Hillary Clinton as an archetypal American disaster, and of Joe Bageant as an unsung hero; and the visionary work of scholars such as Pitirim Sorokin and Lewis Mumford. All in all, *Are We There Yet?* will have you thinking about what the possibilities are for achieving some semblance of sanity in a world completely out of kilter. Tech giants and automakers have been teaching robots to drive. Robot-controlled cars have already logged millions of miles. These technological marvels promise cleaner air, smoother traffic, and tens of thousands of lives saved. But even if robots turn into responsible drivers, are we ready to be a nation of passengers? In *Are We There Yet?*, Dan Albert combines historical scholarship with personal narrative to explore how car culture has suffused America's DNA. The plain, old-fashioned, human-driven car built our economy, won our wars, and shaped our democratic creed as it moved us about. Driver's ed made teenagers into citizens; auto repair made boys into men. Crusades against the automobile are nothing new. Its arrival sparked battles over street space, pitting the

masses against the millionaires who terrorized pedestrians. When the masses got cars of their own, they learned to love driving too. During World War II, Washington nationalized Detroit and postwar Americans embraced car and country as if they were one. Then came 1960s environmentalism and the energy crises of the 1970s. Many predicted, even welcomed, the death of the automobile. But many more rose to its defense. They embraced trucker culture and took to Citizen Band radios, demanding enough gas to keep their big boats afloat. Since the 1980s, the car culture has triumphed and we now drive more miles than ever before. Have we reached the end of the road this time? Fewer young people are learning to drive. Ride hailing is replacing car buying, and with electrification a long and noble tradition of amateur car repair—to say nothing of the visceral sound of gasoline exploding inside a big V8—will come to
