Apply paint to the car using the 4-inch roller. Soak up just a small amount of paint and then force the paint out of the roller. This should produce a thin coat of paint. Use the foam wedge brushes for hard to reach spots. Let the first coat dry for 8 to 24 hours, depending on humidity, before applying a second coat.

STEP-BY-STEP AUTOMOTIVE PAINTING GUIDE

The auto paint store should have a large rack (or stack) of "color paint chip" books with small samples of all the colors used on domestic and foreign cars and trucks, going back several years. You can choose one of these colors, have the shop mix up a small amount (say, a pint) from the formula, and go home and spray it on something to see how you like it.

Automotive Painting Guide: What Products to Use

One requires a few paint rollers, and a can of paint while the other involves a litany of products, clear coats, primers, and sprayers. That's why professional auto paint jobs can't get so pricey....
