Hear the songs and learn about 12 of North America's woodland birds. Being able to identify a bird's song is a skill that brings joy and fosters an appreciation of nature. Some bird songs are distinctive and easily recognized, like the common loon and wild turkey. Hawks as a group are distinctive but the individual species vary, as do the owls. Picking up the songs of a Black-capped Chickadee and a White-breasted Nuthatch, however, is not easy. That is where this enchanting book comes into its own. The Little Book of Woodland Bird Songs features recordings of twelve bird songs from some of the best-known woodland species seen and heard in North America. It is an interactive board book that is ideal for curious young

readers. The sturdy pages are easy to turn and the twelve song buttons, each with a portrait of the bird, are easy to activate. The high-quality sound module is encased in durable plastic and the one-inch (3-cm) speaker makes it easy to hear and differentiate the elements of the bird's song, such as pitch, tempo and trills. Beautiful lifelike illustrations aid in identifying the birds and a descriptive paragraph and facts panel provide information such as the time of day the bird is likely to sing, what it eats, behavior traits and how it constructs its nest. All twelve birds have winter or summer ranges in the United States or Canada. This means that readers are sure to see most if not all the birds in at least one season over the year. Red Crossbill Sharp-shinned Hawk Hermit Thrush Blue-gray Gnatcatcher Black-capped Chickadee Purple Finch Common Loon Barred Owl Red-eyed Vireo Wild Turkey White-breasted Nuthatch Downy Woodpecker. Birds can be hard to spot at the best of times and never more so than in the woods. Once you learn to recognize these bird sounds, a walk through the forest will never be the same. This partner to *The Little Book of Backyard Bird Songs* is sure to become another family favorite.

In *Bird Songs*, ornithologist Les Beletsky profiles 250 birds alongside colorful illustrations, and includes a digital audio player that provides the corresponding song for each of the 250 birds. Drawing from the collection of the world-renowned Macaulay Library at the Cornell Lab of Ornithology, *Bird Songs* presents the most notable North American birds—including the rediscovered ivory-billed woodpecker—in a stunning format. Renowned ornithologist Les Beletsky provides

a succinct description of each of the 250 birds profiled, with an emphasis on their distinctive songs. Lavish full-color illustrations accompany each account, while a sleek, built-in digital audio player holds 250 corresponding songs and calls. In his foreword, North American bird expert and distinguished natural historian Jon L. Dunn shares insights gained from a lifetime of passionate study. Complete with the most up-to-date and scientifically accurate information, Bird Songs is the first book to capture the enchantment of these beautiful birds in words, pictures, and song.

Features twenty-eight common species of eastern and central North American bird songs, grouped primarily by the acoustic similarity of the birds. Includes the sounds of three mammals whose vocalizations may be confused with those of birds.

A field guide that revolutionizes warbler identification. Warblers are among the most challenging birds to identify. They exhibit an array of seasonal plumages and have distinctive yet oft-confused calls and songs. The Warbler Guide enables you to quickly identify any of the 56 species of warblers in the United States and Canada. This groundbreaking guide features more than 1,000 stunning color photos, extensive species accounts with multiple viewing angles, and an entirely new system of vocalization analysis that helps you distinguish songs and calls. The Warbler Guide revolutionizes birdwatching, making warbler identification easier than ever before. For more information, please see the author videos on the Princeton University Press website.
