Focusing on experimental methods, authors Anne Myers and Christine Hansen lead students step by step through the entire research process, from generating testable hypotheses to writing the research report. The major sections of the book parallel the major sections of a research report (Introduction, Method, Results, and Discussion), giving students the skills they'll need to design and conduct an experiment, analyze and interpret the research findings, and report those findings. Although the main focus is on experimentation, alternative approaches are discussed as important complements. Most new psychology instructors enter their first undergraduate classrooms with little or no formal preparation for their role as a teacher. The goal of this book is to review the body of teaching research that is available as well as some of the well-accepted lore, so as to make the first foray into teaching psychology a positive experience. Teaching Psychology outlines the major problems and issues confronting psychology teachers. It presents an overview of the "nuts and bolts" of teaching psychology including dealing with troubled and troubling students, choosing and using technology, developing evaluation instruments, and selecting methods for self-evaluation. Written by two award-winning psychology professors with over 50 years of combined teaching experience, the book offers a wide range of down-to-earth suggestions and immediately usable materials intended to help psychology teachers teach better and help students learn more. The chapters are organized to roughly parallel the sequence of tasks that new psychology teachers face, beginning with goal setting and ending with evaluation of one's teaching. Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade-record sheet, a sample statement on academic integrity and a pool of less-than-perfect test items to hone item-writing skills. This book offers guidelines for teaching such as: setting goals in line with 10 basic principles of effective teaching planning the basics including choosing a text, writing a syllabus, and creating a grading system setting a positive
