evolution of the railroad industry and the historical impact of its progress on the North American continent. This thoroughly researched work examines the various aspects of the industry's development: technology, operations, cultural impact, the evolution of public policy regarding the industry, and the structural functioning of modern railroads. More than 500 alphabetical entries cover a myriad of subjects, including numerous entries profiling the principal companies, suppliers, manufacturers, and individuals influencing the history of the rails. Extensive appendices provide data regarding weight, fuel, statistical trends, and more, as well as a list of 130 vital railroad books. Railfans will treasure this indispensable work.

Niemann's travels as an itinerant brakeman on the Southern Pacific. Boomer combines travelogue, Wild West adventure, sexual memoir, and closely observed ethnography. A Berkeley Ph.D., Niemann turned her back on academia and set out to master the craft of railroad brakeman, beginning a journey of sexual and subcultural exploration and traveling down a path toward recovery from alcoholism. In honest, clean prose, Niemann treks off the beaten path and into the forgotten places along the rail lines, finding true American characters with colorful pasts—and her true self as well.

On October 10, 1888, the worst train disaster in the history of Pennsylvania took place at the Mud Run station in Carbon County. The victims were excursionists, the vast number of whom were Irish or Irish-Americans, who had

traveled from Scranton to Hazleton to celebrate the birth of Father Mathew Theobald, the Irish Apostle of Temperance, with a parade and picnic arranged by the Total Catholic Abstinence Union. In anticipation of moving as many as 10,000 passengers between Hazleton and Scranton on eight trains, consisting of eighty-seven cars, the Lehigh Valley Railroad had issued special orders to its crew, the most important of which was "to protect your rear." After the Father Mathew Men had marched and the Father Mathew Cadets had displayed their skill in precision drills, the disciples of temperance headed for the Hazleton train station and home. It was on their return that sixty-four people would meet their deaths on the Lehigh Valley road. The primary source of information for this book was the newspapers. In addition to newspaper interviews with eyewitnesses to

the disaster, additional information was gleaned from census schedules, city directories, ancestry message boards, death notices, obituaries, and correspondence with descendants of those killed at Mud Run. Together, they tell the story of what went wrong on that beautiful autumn day at a remote signal station in Carbon County.

A meal in the dining car was often the highlight of any train trip. Gordon Mooneyhan, a lifelong railroad enthusiast, as well as an accomplished amateur chef, has captured the essence of those bygone days in the Atlantic Coast Line Dining Car Cookbook. The "Coast Line" was one of the railroads that actually maintained a cookbook. Still, the copies that were in archives were not complete. Gordon was able to search libraries and other sources to find many of the missing recipes,

although some, such as "Coast Line Dressing" have been lost to time. In those instances, Gordon has "recreated" the recipes, based on descriptions of the original, and they are noted as such in the book. Also included is a history of "Hitching Post Foods." Hitching Post Dressing and Mint Syrup were used on the ACL dining cars, and recipes for those items have been recreated here. Take a step back in time and enjoy meals from an era when life was simpler, less hectic, and when getting there was half the fun!

Aaron W. Marrs challenges the accepted understanding of economic and industrial growth in antebellum America with this original study of the history of the railroad in the Old South. Drawing from both familiar and overlooked sources, such as the personal diaries of Southern travelers, papers and letters from civil engineers,

corporate records, and contemporary newspaper accounts, Marrs skillfully expands on the conventional business histories that have characterized scholarship in this field. He situates railroads in the fullness of antebellum life, examining how slavery, technology, labor, social convention, and the environment shaped their evolution. Far from seeing the Old South as backward and premodern, Marrs finds evidence of urban life, industry, and entrepreneurship throughout the region. But these signs of progress existed alongside efforts to preserve traditional ways of life. Railroads exemplified Southerners' pursuit of progress on their own terms: developing modern transportation while retaining a conservative social order. Railroads in the Old South demonstrates that a simple approach to the Old South fails to do justice to its complexity and

Michael Dante played the title role in *Winterhawk* (1975), a Western about a legendary Blackfoot Chief's character and his principles. In this novella sequel, he pens an ageless saga about ruthless railroad executives trying to assassinate him in order to build their railroad directly through his territory, taking the Blackfoot land without provocation. *Winterhawk* and his tribe remain strong as long as they can, to protect the land of their people, the land they call home, before the invasion of progress imposes itself on America. This inspiring story of a brave man, who stands up to and fight against those who have their own agenda for his land, evokes the nostalgic atmosphere of Western series that Dante frequently appeared in during American television's Golden Era, such as *Death Valley Days*, *The Big Valley*,
