social world reflected in the language and the values that their speeches betray. A key contribution of this monograph is to highlight how the perspective of illness as retribution is powerfully refuted in Job's

this monograph carefully analyses the expression of pain in Job focusing specifically on somatic language used in the deity attack metaphors, in the deity surveillance metaphors and in the language

connected to the body and social status. These metaphors are analysed in a comparative way using research from medical anthropology and sociology which focuses on illness narratives and expressions
