Apply the ancient technique of building with cob to contemporary situations, with these detailed illustrations and instructions.

Building with Cob shows how to apply this ancient technique in a wide variety of contemporary situations, covering everything from design and siting, mixing, building walls, fireplaces, ovens and floors, lime and other natural finishes, and gaining planning permission and building regulation approval.

"The ancient method of cob building uses a simple mixture of clay sub-soil, aggregate, straw and water to create solid structural walls built without shuttering or forms, onto a stone plinth. It is now undergoing a renaissance as an 'eco-friendly' building material because of its amazing 'green' credentials. 'Building with Cob' shows how to apply this ancient technique in a wide variety of contemporary situations, covering everything from design and siting, mixing, building walls, fireplaces, ovens and floors, lime and other natural finishes, and gaining planning permission and building regulation approval. It also explains in detail how to sensitively restore an old cob structure. This book is a step-by-step guide, lavishly illustrated with over 300 colour photos and 85 diagrams."--Amazon.

Cob, a structural composite of earth, water, straw, clay, and sand, has been used for centuries, in virtually all parts of the world, to create homes ranging from mud huts in Africa to lavish adobe haciendas in Latin America. This practical and inspiring hands-on guide teaches anyone to build a cob dwelling.

Cob (an old English word for lump) is old-fashioned concrete, made out of a mixture of clay, sand, and straw. Becky Bee's manual is a friendly guide to making your own earth structure, with chapters on design, foundations, floors, windows and doors, finishes, and of course, making glorious cob. "I believe that building with cob is a way to recreate community and experience the joy of working together while taking back the right to build our own homes and look after our Mother Earth." She loves doing something that makes sense in a world where lots of things don't.

The only comprehensive, illustrated, step-by-step guide to building with earthbags. Over seventy percent of Americans cannot afford to own a code-enforced, contractor-built home. This has led to widespread interest in using natural materials-straw, cob, and earth-for building homes and other buildings that are inexpensive, and that rely largely on labor rather than expensive and often environmentally-damaging outsourced materials. Earthbag Building is the first comprehensive guide to all the tools, tricks, and techniques for building with bags filled with earth-or earthbags. Having been introduced to sandbag construction by the renowned Nader Khalili in 1993, the authors developed this "Flexible Form Rammed Earth Technique" over the last decade. A reliable method for constructing homes, outbuildings, garden walls and much more, this enduring, tree-free architecture can also be used to create arched and domed structures of great beauty-in any region, and at home, in developing countries, or in emergency relief work. This profusely illustrated guide first discusses the many merits of earthbag construction, and then leads the reader through the key elements of an earthbag building: Special design considerations Foundations, walls, and floors Electrical, plumbing, and shelving Lintels, windows and door installations Roofs, arches and domes Exterior and interior plasters. With dedicated sections on costs, making your own specialized tools, and building code considerations, as well as a complete resources guide, Earthbag Building is the long-awaited, definitive guide to this uniquely pleasing construction style. Mother Earth News Wiser Living Series

Helps environmentally conscious readers build a home with the health of the planet as a primary concern, offering advice on design, siting, and construction of various types of sustainable buildings.

Many copies in stock but still heavy demand; only a few titles published on this subject. Very popular in rural WA too.

Earth is the mother of all construction materials. For thousands of years, people have dug up the clay-soil below their feet and transformed it into the most versatile building material. Worldwide, people are rediscovering the advantages of earthen construction, and for good reasons: its easy to work with, extremely affordable, environmentally friendly, non-toxic, durable and beautiful! A few simple tools, such as buckets, shovels and a wheelbarrow is all you need to get started. By describing how to combine and process the basic ingredients of clay-soil, sand and straw, this book makes it clear and simple on how to make earthen building something you can start with the moment you put down the book! You will learn how to build with the most popular and time-tested techniques: Cob Adobe Light straw-clay Earth bags Earthen plasters Earthen floors Clay paints These techniques are being used to build entire houses, as well as for smaller projects, such as backyard sheds, cabins, outdoor fireplaces, garden walls and play houses. As a bonus, the appendix has complete instruction on how to build an earthen bread- and pizza oven, using the techniques described in the book. This makes for a great starter project! An often overlooked possibility is using earthen building methods to renovate existing homes on a shoestring budget, transforming run-down houses into earthen homes, without having to work with toxic or environmentally harmful building materials. After reading this book, you will realize how simple it is to integrate earthen materials with conventional building materials. The book covers everything, from identifying the right materials, to how to build arches and niches and incorporate plumbing and electric. It is also supported by YouTube videos and photos, which can be found at www.HouseAlive.org, adding additional clarity to the writing. "Conrad Rogue is a great builder, teacher, and philosopher. He is original in his thinking, skilled in his techniques, and passionate about the beauty and potential of earthen construction. And above all, he has the rare ability to skillfully convey all of that in his writing." ~ Mother Earth Magazine Conrad Rogue has been teaching earthen construction since 2001. He is the founder and director of House Alive. (www.HouseAlive.org). He has taught workshops in the United States, Mexico, Spain, Italy and India.

The popularity of natural building has grown by leaps and bounds, spurred by a grassroots desire for housing that is healthy, affordable and environmentally responsible. While there are many books available on specific methods such as strawbale construction, cob or timber framing, few other resources introduce the reader to the entire scope of this burgeoning field. Fully revised and updated, The Art of Natural Building is the complete and user-friendly introduction to natural building for everyone from do-it-yourselfers to architects and designers. This collection of articles from 60 leaders in the field is stunningly illustrated with over 400 photos of natural buildings from around the world. At 465 pages, this massive resource is over 50% longer than the original edition. Out of 64 chapters, 26 are new to this edition, and nearly all of the rest have been completely revised to reflect recent developments. Learn about: The case for building with
