The Second Edition of this comprehensive “how to” text has been completely revised and updated. This text outlines the basics of case management and illustrates some of the pitfalls encountered in the field of case management. The book provides information on the new Case Management Standards, supplies standard definitions and guidelines of case management for the practicing case manager, and presents information on caring for clients in a wide variety of health care settings. New to this edition—chapters focusing on Quality Reviews and Risk Management with a strong emphasis on Continuous Quality Improvement (CQI), ethical and legal issues, and various case studies.

Managing a major case is among the most challenging managerial functions that anyone in law enforcement can perform, and there are numerous pitfalls to avoid. It is the goal of this book to provide law enforcement managers with the necessary tools and strategies they can use in managing their next major case. Many of these strategies were learned through trial and error. It begins with a look at the various elements of the investigative process. Organization of the investigative unit, whether it is a general assignment or highly specialized unit, is discussed as well as how to determine proper.

Stem Cell and Bone Marrow Transplantation

A new and updated version of this best-selling resource! Jones and Bartlett Publisher's 2011 Nurse's Drug Handbook is the most up-to-date, practical, and easy-to-use nursing drug reference! It provides: Accurate, timely facts on hundreds of drugs from abacavir sulfate to Zovox; Concise, consistently formatted drug entries organized alphabetically; No-nonsense writing style that speaks your language in terms you use everyday; Index of all generic, trade, and alternate drug names for quick reference. It has all the vital information you need at your fingertips: Chemical and therapeutic classes, FDA pregnancy risk category and controlled substance schedule; Indications and dosages, as well as route, onset, peak, and duration information; Incompatibilities, contraindications; interactions with drugs, food, and activities, and adverse reactions; Nursing considerations, including key patient-teaching points; Vital features include mechanism-of-action illustrations showing how drugs at the cellular, tissue, or organ levels and dosage adjustments help individualize care for elderly patients, patients with renal impairment, and others with special needs; Warnings and precautions that keep you informed and alert.
