Chapter 8 Support and movement

8.1 Support systems in animals. 1.

Endoskeleton. a) Also known as the internal skeleton. b) Located inside the body of all vertebrates including human beings, elephants and fishes. c) Made up of either bones or cartilage. 2. Functions of endoskeleton.

Chapter 7 :Dynamics: Chapter 8 Support and movement

Most joints, allow movement. Eg. Elbow or knee are called hinge joints because the movement is

File Type PDF Chapter 8 Support And Movement

like the hinge on a door. They can only move forwards and backwards. A few joints such as hip , are called ball-and-socket joints because the end of one bone forms a round structure like a ball that fits into a cup-shaped socket.
