**\*\* ACCORDING TO BUSINESS INSIDER:** "Getting your MBA has never been easier. Haroun is one of the highest rated professors on UdeMy, so you can expect to be in good hands through the course of your education." **\*\* This is the book version of the popular UdeMy.com course called "An Entire MBA in 1 Course."** From the Author of "101 Crucial Lessons They Don't Teach You in Business School," which Forbes magazine calls "1 of 6 books that all entrepreneurs need to read right now." This book will teach you everything you need to know about business...from starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" business summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at www.udemy.com/user/chris-haroun/.

Who needs a mountain of debt? Each year, the nation's top business schools are flooded with applications from people eager to pursue their MBA dreams. But those aspirations come at a steep price. According to U.S. News and World Report, the average debt load for graduates of NYU's Stern School of Business, MIT's Sloan School of Management, and other top business schools exceeds \$100,000. Like most, author Laurie Pickard couldn't shoulder that. But she faced a dilemma: despite two degrees and a Peace Corps stint, she needed a business education to land her dream job in international development. She decided to take her education into her own hands, and found that some of those same prestigious business schools offer MOOCs (massive online open courses) for low or even no cost. By picking the right classes from the best schools, she gained the skills--without all the debt. In Don't Pay for Your MBA, Pickard shows self-starters, career changers, and budding entrepreneurs how to navigate the expanding universe of online education. Building on her popular No-Pay MBA blog, Pickard reveals how to: Define your goals and tailor a curriculum that works for you \* Master the language of business \* Build a strong network \* Choose a concentration and deepen your expertise \* Showcase your nontraditional education in a way that attracts offers Self-directed learning fills gaps in your training, positions you for promotions, and opens up new opportunities. Business is one of the great social equalizers for our global society. Commerce, business, supply and demand, entrepreneurs, corporations, and other business-related ideas have become second nature to most areas of the planet. Given the collective interest in and significance of business, people naturally want to become experts. They read newspapers, study the stock market, enroll in business school, and even design career paths so that they can become a business professional. Some people are of the opinion that true business insight and savvy can only come from formal academic institutions, while others argue that real world experience is the best teacher. There are positive and negative arguments for both of those lines of logic. This book is meant to bridge the gap between stuffy lecture halls and experience-building employment. The idea of encapsulating an entire MBA in a single book may seem overly bold or unrealistic, but by boiling down the concepts of business success and modern theory into a single book, it becomes far less intimidating for readers who want to push their career forward, regardless of where they are in the business hierarchy. This book contains everything from invaluable reminders for CEOs to inspiring advice for first-time, start-up entrepreneurs. Becoming a powerful and successful business professional is a never-ending journey, because you will always be learning and developing your skills, adapting them to the dynamic world of modern business. This book helps to facilitate that educational process, providing the real-world examples of business skills, knowledge components, foundational qualities, and professional tools that can push you in the right direction. If you're starting a business, running a business, or looking for a job, you probably don't have much time to enroll in business school, read a dozen dry textbooks on corporate theory, or constantly stay appraised of every new development in global commerce. While this book may not answer all your questions about how to find success, it will highlight the most important elements on the road to becoming a desirable, effective, and powerful business professional. By drawing from some of the most successful business models and business professionals in recent history, you can look at problems from new perspectives and hopefully find some inspiration from some of the greatest minds of our generation. From international titans like Walmart and Amazon to crowdsourcing sites and charitable retailers, there are lessons to be learnt on every one of these pages, no matter what size company you work for or what ambitious plans you have for your new enterprise. The MBA Book simplifies the business process by incrementally moving from the conceptual foundation of a company to the final touches, including the skills and tools that an established company should tweak and perfect in order to remain competitive and successful.

Instant MBA contains top tips for rapid career advancement minus the academic jargon and waffle - taking you straight to the important bits. If you are thinking of doing an MBA but are time-poor, if you can't afford to do an MBA or if you are currently doing an MBA and can't see the wood for the trees, Instant MBA is essential reading.
