Material Take-off Sheet versus Material List | How To ...

A material take off (MTO) is the process of analyzing the drawings and determining all the materials required to accomplish the design. Thereafter, the material take off is used to create a bill of materials (BOM). Inspection does not aid in creating a bill of materials. Procurement and requisition are activities that occur after the bill of materials is complete. References. Whitt, Successful Instrument and Control System Design, ISA Press, 2004.

Material take off - Wikipedia

A construction takeoff by definition is the process of quantifying the material quantity required for a construction project by counting and measuring items from a set of drawings that construction businesses receive from general contractors and owners. The items being counted and measured are represented with various symbols that are usually trade specific and depicted on the plans you receive from a general contractor.
