Berlin patient: First person cured of HIV, Timothy Ray...

The strongest proof that HIV can be cured comes from the case of Timothy Brown, the "Berlin patient." That triumph was predicated on physicians taking advantage of nature's own experiment: the existence of a genetic mutation in a normal cell protein, CCR5, the main co-receptor that HIV uses to gain entry into a cell.

Understanding Exactly How the 'Berlin Patient' Was Cured

Two men, known in medical journals as the Berlin Patients, revealed answers to a functional cure for HIV. Their cures came twelve years apart, the first in 1996 and the second in 2008. Each received his own very different treatment in Berlin, Germany, and each result spurred a new field of investigation, fueling innovative lines of research and ...

How did the 'Berlin patient' rid himself of HIV? | Science...

The Berlin patient is a phrase that has been used on two distinct and unrelated occasions. In the first case, it was used to describe an anonymous person from Berlin, Germany, who has exhibited prolonged "post-treatment control" of HIV viral load after HIV treatments were interrupted. In the second case, the phrase was used to preserve the anonymity of the first individual who is considered to have been cured of HIV infection, when his case was presented at the 2008 Conference on Retroviruses and

Berlin Patient—Wikipedia

Timothy Brown, also known as "The Berlin Patient," is thought to be the only individual cured of HIV. Originally from Seattle, Washington, Brown was pursuing his studies in Berlin, Germany when he was diagnosed with HIV in 1995. After controlling the virus for many years with antiretroviral therapy, Brown was diagnosed with acute myeloid leukemia (AML) and in 2007 underwent stem cell transplantation after unsuccessful chemotherapy.

Berlin Patient | defeatHIV

In a Chronicle interview in 2011, Brown said he'd been invited to attend an AIDS activist panel in San Francisco shortly after naming himself as the Berlin Patient.
