The Designer's Dictionary of Type follows in the footsteps of The Designer's Dictionary of Color, providing a vivid and highly accessible look at an even more important graphic design ingredient: typography. From classic fonts like Garamond and Helvetica, to modern-day digital fonts like OCR-A and Keedy Sans, author and designer Sean Adams demystifies 48 major typefaces, describing their history, stylistic traits, and common application. Adams once again provides eye-catching illustrated examples, this time showcasing the beauty and expressiveness of typography, as employed by the world's greatest designers. Organized by serif, sans-serif, script, display, and digital typefaces, this book will be a vital guide for designers, teachers, or students looking to gain a foundational understanding of the art, practice, and history of typography.

The colour forecasting process is a major driving force in the fashion and textile industries but is complex, highly intuitive and little understood. This textbook for students of fashion and design discusses the development of the various driving forces of fashion, when colour forecasting began and how it has developed to its present day state. Colour terminology and some of the more subjective tools used by colour forecasters are explained, and their strengths and weaknesses are compared. Also, a model is given of the colour forecasting process and this is discussed in detail. Finally, readers are shown how forecasting methodologies are used to develop 'colour stories'.
