Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world." —John Brunner "A kind of pulp-fiction Kafka, a prophet." —The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from." —Rolling Stone

Public transportation is in crisis. Through an assessment of the history of automobility in North America, the “ three revolutions ” in automotive transportation, as well as the current work of committed people advocating for a different way forward, James Wilt imagines what public transit should look like in order to be green and equitable. Wilt considers environment and climate change, economic and racial inequality, urban density, accessibility and safety, work and labour unions, privacy and control of personal data, as well as the importance of public and democratic decision-making. Based on interviews with more than forty experts, including community activists, academics, transit planners, authors, and journalists, Do Androids Dream of Electric Cars? explores our ability to exert power over how cities are built and for whom.

In the year 2019, lifelike robots clash with their human makers in an effort to alter the destiny for which they have been programmed.

Seminar paper from the year 2006 in the subject American Studies - Literature, grade: 1,00, Catholic University Eichstatt-Ingolstadt (Sprach- und Literaturwissenschaftliche Fakultät), course: Novel and Film, 10 entries in the bibliography, language: English, comment: This paper deals with the impact and the effects created by the somewhat ambiguous representation of human and android life in Dick's work "Do Androids Dream of Electric Sheep?" (Blade Runner), abstract: "Do Androids Dream of Electric Sheep?" is one out of at least six novels by Philip K. Dick that deal substantially with the questions surrounding androids. It is exactly the distortion between the real as the jumping-off point cited above and the hypothetical, unreal, fictional which creates a critical comment on the world the present reader lives in. The special focus on humanlike androids in "Do Androids Dream of Electric Sheep" implies a particular philosophical issue. Of course, the somewhat murky, obscure and intransparent depiction of androids involves the problem of man-machine relationships, which can to a certain extent be equated with human-android relationships. But Dick goes a step further, pointing out the differences as well as the parallels between both the android and the human being, using ambiguous descriptions and playing with the reader's sympathy for both sides. One could even argue that Dick tried to create a kind of meeting halfway between man and android. Certainly, Dick himself faces difficulties when trying to define the android as "a thing somehow generated to deceive us in a cruel way, to cause us to think it to be one of ourselves." This description meets exactly to core of our analysis, which deals with the impact and the effects created by this somewhat ambiguous representation of human and android life."
