Lab 6 - Echinoderms and Chordates Introduction to Echinoderms. Our closest cousin among the invertebrates is a most unlikely taxon, the echinoderms (Phylum Echinodermata, = spiny skin; 6,000 sp) Echinoderms are eucoelomate deuterostomes. They show a superficial five part (pentamerous) radial symmetry. The larvae are bilaterally symmetric, cephalized, and motile, but they develop into sessile or sedentary radially symmetric adults.

Body Dissection. Place the frog belly side up in the dissecting tray. You can pin down the limbs if necessary. Lift up the skin with forceps midway between the hind legs of the frog. Use scissors to cut the skin along the midline of the frog starting between the hind legs and ending at the neck. Be careful not too cut too deeply.

Teaching Delivery Mode: Face-to-Face Print Version. Introduction to Biology: An Ecosystem Approach Laboratory Manual, 2nd Edition is designed provide a one-semester preview for introductory-level university courses in the areas of: Basic Microscopy; Body Symmetry, Body Planes, Body Regions; Biological Classification; Approaches to the Scientific Method; Introductions to multiple Fungi, Plant, and Animal Phyla: Fungi: Chytridiomycota; Zygomycota; Ascomycota; Basidiomycota; Glomeromycota; Plant: Non-Vascular: Bryophyta; Hepatophyta; Anthocerophyta; Vascular Seedless: Pteridophyta; Equisetophyta; Lycopodophyta; Psilophyta; Vascular Seed: Coniferophyta; Cycadophyta; Ginkophyta; Gnetophyta; Anthophyta; Animal: Porifera; Cnidaria; Platyhelminthes; Annelida; Mollusca; Arthropoda; Echinodermata; Chordata; Basic Animal Form and Function through Dissection; Animal Behavior; Ecological Correlations between Species. A general understanding and appreciation of these venues provides a strong foundation for more advanced biology courses. The laboratory manual strives to present the material in a unique way by introducing basic principles then applying them in context within ecosystems instead of strictly by concept or phyla. In doing so, students are able to visualize a holistic approach to diversification, form and function, and behavior, and are better equipped to associate conceptual exercises with the world in which they live. Teaching Delivery Mode: Introduction to Biology: An Ecosystem Approach Laboratory Manual, 2nd Edition is designed to facilitate all three main course delivery modes: face-to-face laboratory environments; hybrid laboratory environments; and fully online laboratory environments. Face-to-Face Laboratory Environments: A version of the laboratory manual that does not include slide images, preserved specimen images, or dissection images allowing students in a F2F setting to take their own pictures or to draw their own images as they review the organisms and complete the dissections for the hands-on laboratory components. Hybrid Laboratory Environments: A version of the laboratory manual that includes all slide images, preserved specimen images, and some dissection images allowing students in a Hybrid setting to take their own pictures of dissections they complete in the hands-on laboratory components. Online Laboratory Environments: A version of the laboratory manual that includes all slide images, preserved specimen images, and all dissection images allowing students who are in a virtual environment without access to laboratory specimens the opportunity to complete all elements of the laboratory exercises.
