observations or data.

Elements of Probability and Statistics

Conditional probability-2. Formally the conditional probability is given as $p(A|B) = \frac{p(A \cap B)}{p(B)}$ Notice how this works for rolling a 3. Since rolling a 3

Read Free Elements Of Statistics Probability By

and rolling an odd number are dependent, the probability of rolling a 3 AND odd is the same as rolling a 3.

$$p(3 \text{ and odd}) = p(3 | \text{odd}) p(\text{odd}) = \frac{1}{6} \cdot \frac{1}{2} = \frac{1}{12}$$
