Mylah Hairston - WEBQUEST - Endocrine System Updated.pdf ...

An animal's endocrine system controls body processes through the production, secretion, and regulation of hormones, which serve as chemical "messengers" functioning in cellular and organ activity and, ultimately, maintaining the body's homeostasis. The endocrine system plays a role in growth, metabolism, and sexual development.

Lab 12: Endocrine System - Biology LibreTexts

Endocrine System. The endocrine system is responsible for many amazing bodily processes: growth, sexual development, the fight or flight response to danger, and the process by which cells make energy and synthesize insulin. How the endocrine system works is complicated, but these activities will help your students understand how it gets the job done.
