Learning how to listen to and analyze talk is fundamental to understanding human communication. This engaging text examines how the "little stuff" of everyday conversation--what we say and how we say it, the terms we use to refer to others, the content and style of stories we tell, and myriad other factors--expresses both who we are and who we want to be.

This engaging text explores how everyday talk--the ordinary kinds of communicating that people do in schools, workplaces, and among family and friends--expresses who we

are and who we want to be. The authors interweave rhetorical and cultural perspectives on the "little stuff" of conversation: what we say and how we say it, the terms used to refer to others, the content and style of stories we tell, and more. Numerous detailed examples show how talk is the vehicle through which people build relationships. Students gain skills for thinking more deeply about their own and others' communicative practices, and for understanding and managing interactional difficulties. New to This Edition *Updated throughout to incorporate the latest discourse analysis research. *Chapter on six specific speech genres (for example, organizational meetings and personal conversation). *Two extended case studies with transcripts and discussion questions. *Coverage of digital communication, texting, and social media. *Additional cross-cultural examples. Pedagogical Features *A preview and summary in every chapter. *Accessible explanations of core concepts. *End-of-book glossary. *Endnotes that identify key authors and suggest further reading.

Drawing on everyday telephone and video interactions, this book surveys how English speakers use grammar to formulate responses in ordinary conversation. The authors show that speakers build their responses in a variety of ways: the responses can be longer or shorter, repetitive or not, and can be

uttered with different intonational 'melodies'. Focusing on four sequence types: responses to questions ('What time are we leaving?' - 'Seven'), responses to informings ('The May Company are sure having a big sale' - 'Are they?'), responses to assessments ('Track walking is so boring. Even with headphones' - 'It is'), and responses to requests ('Please don't tell Adeline' - 'Oh no I won't say anything'), they argue that an interactional approach holds the key to explaining why some types of utterances in English conversation seem to have something 'missing' and others seem overly wordy.

This book shows how a good schmooze can be turned to social benefit, without the humiliation of "sucking up" or the hypocrisy of the "the hard sell." * Conversational exchanges in social life, family life, workplace talk, educational interaction, and cross-cultural sequences * Excerpts from interviews, media, and ordinary verbal interactions * Examples of personalities schmoozing well, and badly * A glossary of sociolinguistic terminology * A bibliography of sources about discourse analysis

The room darkens and grows hushed, all eyes to the front as the screen comes to life. Eagerly the audience starts to thumb the pages of their handouts, following along breathlessly as the slides go by one after the other... We're not sure what the expected outcome was when PowerPoint first emerged as the industry standard model of presentation,

but reality has shown few positive results. Research reveals that there is much about this format that audiences positively dislike, and that the old school rules of classical rhetoric are still as effective as they ever were for maximizing impact. Renowned communications researcher, consultant, and speech coach Max Atkinson presents these findings and more in a groundbreaking and refreshing approach that highlights the secrets of successful communication, and shows how anyone can put these into practice and become an effective speaker or presenter. Topics Include: DT How to win and hold the attention of audiences; DT Using visual aids and PowerPoint more effectively; DT Getting your message across and winning applause; DT Inspiring audiences; DT How to prepare quickly; DT Fact and fiction about body language and non-verbal communication

"AmongUS" presents readings from individuals whose intercultural experiences give insights on how to achieve a fair multicultural society where cultural identities are celebrated and maintained. The essays provide a rich source of materials to teach a broad array of interpersonal, sociological, and psychological concepts that apply to educational, business, and cultural settings. The authors have arranged the book around four themes: Identity, Negotiating Intercultural Competence, Racism and

Prejudice, and Belonging to Multiple Cultures. New to the 2nd EditionA new text organization -- rearrangement of the sections and of the essays within each section -- provides a better depiction of the processes when living in an intercultural world. 10 new essays enhance and broaden the text's range of intercultural voices and experiences. Included among these new essays are "second" essays from authors (Mei Lin Swanson Kroll, Alfred J. Guillame, Jr., Vickie Marie, and Tadasu "Todd" Imahori) who describe an ongoing intercultural journey in which the author continues to learn and to live. "Culture Concepts" boxes provide more explicit links to the theory that underlies the lived experiences that are depicted. Each essay concludes with exercises and discussion questions, "Learning AmongUS," that encourage students to analyze and reflect on the essay. The new edition contains more direct and straightforward links with the authors' other intercultural text, "Intercultural Competence," allowing easier use for instructors who teach with both texts in their course.Praise for "AmongUS" "The fact that the text is a reader makes it stand out among the rest. Its first-person narrative style is so engaging. We slip into another's skin for a moment. We feel what they feel and then slip out again changed. The text truly has this kind of impact on many of my students. It offers the understanding of intercultural issues that are less accessible
