It is similar to the Lambda exam but more is required. Children recite a poem or monologue, read a literary passage and make a 3 minute presentation and answer questions relating to it. They also must sit in another two presentations and ask questions. It teaches them presentation, public speaking and listening skills.

This book describes the process of language test construction and reviews current practice.

"Since the early 1980s, Australian governments have pursued policies of 'international competitiveness' that combine the removal of tariffs and other industry protection with incentives to restructure the economy and encourage industries in which Australia enjoys a comparative advantage." -- Cover.

While our leaders celebrate Australia's 'economic miracle', unemployment, particularly long-term unemployment, has become a permanent feature of Australia's economic landscape. Its unacceptably high level has proved remarkably resistant in the face of sustained economic growth and increased prosperity. The adverse economic and social consequences of high unemployment are likely to leave long-term scars on those affected, as well as on local communities and the entire fabric of Australian society. Yet these effects rarely feature on the policy agenda, and the costs of unemployment remain largely invisible.

This book examines the experiences of couples with different language backgrounds and different cultural origins as they negotiate love, partnership and parenting. It is based on the author's doctoral research into the attitudes and experiences of the English-speaking background (ESB) partners of non-English-speaking background (NESB) migrants in Sydney, Australia. In particular, it seeks to understand how these English speakers negotiate being in a romantic relationship with someone who has a different first language. It explores how those from an ESB reconcile the negative perspectives of Anglophone culture towards "other" languages, with their desire to be a good partner who respects the linguistic differences in their relationship. The book is organised into six chapters, which move from a focus on the language of the individual, to the languages of the couple, and then to the wider family. The main finding is that although ESB partners had very different beliefs and attitudes towards language learning to their migrant partners, they attempted to compensate for these differences in various ways. It will be of particular interest to students and scholars in the fields of language education, minority languages, and language policy and planning.

This book is a must-have for both beginners and experienced brewers looking for great new recipes.

Never before has the evolution of pale ale been so thoroughly explored. Terry Foster pays proper homage to this distinctive ale and the sub-styles it has spawned. This all-new revised and expanded edition includes a new section on American IPA's, pale ales and amber ales. The Classic Beer Style Series from Brewers Publications examines individual world-class beer styles, covering origins, history, sensory profiles, brewing techniques and commercial examples.

Knowledge and Discourse presents an ecological approach to the study of discourse in social, academic and professional practices. It brings together distinguished scholars from diverse cultures - India, China, Australia, Canada among others - and disciplines - linguistics, anthropology, sociology, philosophy. The chapters collectively illustrate the ecological approach by exploring how language makes connections between subjective experiences as people construct meaning and action. This book offers the reader a holistic, interdisciplinary approach to the study of language as discourse, questioning traditional views of disciplinary knowledge and the role of discourse in the pursuit, construction and compartmentalisation of such knowledge. Through the variety of disciplines, experiences and approaches, the contributors show how the world and word are contingent on each other. The notions of connectivity, contingency and change are themes that run through the book, and in the interweaving of these themes readers will find persuasive illustrations of an ecological approach to applied linguistics.

As the global economic crisis ripples across the financial, political and social landscape, it is leaving its mark on international migration. The recession, hailed as the worst since the Great Depression, is impacting the scope and pace of international migration and its effects could deepen should the world economy worsen. Governments, businesses and individuals have all felt the damaging consequences of the global downturn, which has shaken confidence in established institutions. The crisis is driving some policymakers and analysts in Europe and North America to re-think their assumptions about labor migration. Yet while policymakers face exceptionally strong popular and political outcry to protect jobs at home, they face mid-term demographic challenges. These two opposing policy pressures require responses that will not only help ease the current economic crisis, but will also secure the long-term prosperity of these regions. This book reflects the effort of the Transatlantic Council on Migration to map how profound demographic change is likely to affect the size and character of global migration flows; and how governments can shape immigration policy in a world increasingly attuned to the hunt for talent. This volume is the second major product of the Council. The Council was launched in 2008 as a new initiative of the
