Common Defense veterans delivering GOP Senators 100,000 petitions to un-endorse Donald Trump. Our History. Common Defense was first founded in 2016 as a grassroots effort led by veterans who opposed Trump’s corrupt agenda of hate. During that time veterans were not well organized to grapple with our frustration with the status quo. Since then, we have led the “Vets Against Trump” movement, helping win impeachment and speaking out daily against his crimes.

Traces the competing strategies and goals, and struggles for manpower and material that have shaped American military institutions

The United States faces the realistic and indefinite threat of terrorist attack with nuclear weapons. Whether the United States is successful in preventing such an attack will depend on whether we effectively wield the instruments of security. It will also depend on whether we effectively manage national security processes and apply the law in a manner that both enhances security and upholds our core values. As a result, lawyers, not just presidents, generals, and spies, will decide the outcome of this conflict. This book, first published in 2007, is essential for anyone wanting an understanding of national security law and process. The book includes chapters on constitutional law, the use of force, and homeland security, presented in the context of today's threats and as applied to issues like rendition and electronic surveillance.

A N UNSPOKEN STANDARD of the Armed Forces has always been, "When the nation is least ready, we must be most ready." While that rings clear as far as warfare is concerned, it is not nearly so when it comes to the realm of domestic security. In spite of strategies that continue to espouse homeland security and homeland defense as "job one," woefully few in the Department of Defense have studied the issues, the intricacies, and the nuances that necessarily surround the use of the military in the domestic environment. Our military's leadership understands intuitively that there are differences in the way that

we can respond "over here" as opposed to "over there." But the majority of our forces have not devoted the type of thinking to those vital distinctions as is most often associated with other aspects of our military's employment. As 9/11 drifts from the personal to the historic, the need to focus on these issues seems to have faded.

The military clauses were perhaps the most contentious in the drafting of the constitution. The old Continental Congress had had an abysmal record in taking care of the army. Promises made to soldiers during the war remained unfulfilled. At the same time, American distrust of European-style professional armies ran deep. This masterful account of the creation of the Constitution shows our founding fathers at work and brings them to life.

Presenting the first analytical overview of the legal foundations of the EU's Common Security and Defence Policy (CSDP), this book provides a detailed examination of the law and practice of the EU's security policy. The European Union's security and defence policy has long been the focus of political scientists and international relations experts. However, it has more recently become of increasing relevance to lawyers too. Since the early 2000s, the EU has carried out more than two dozen security and defence missions in Europe, Africa, and Asia. The EU institutions are keen to stress the security dimension of other external policies also, such as development cooperation, and the Lisbon Treaty introduces a more detailed set of rules and procedures which govern the CSDP. This book provides a legal analysis of the Union's CSDP by examining the nexus of its substantive, institutional, and economic dimensions. Taking as its starting point the historical development of security and defence in the context of European integration, it outlines the legal framework created by the rules and procedures introduced by the Treaty of Lisbon. It examines the military operations and civilian missions undertaken by the Union, and looks at the policy context within which they are carried out. It analyses the international agreements concluded in this field and explores the links between the CSDP and other external policies of the Union.

"Ecological catastrophes are only terrifying for civilians. For the military, they are but a simulation of chaos, an opportunity to justify an art of warfare which is the more autonomous as the political State dies out. At this point, all civilian populations are helpless victims of the scam, of this ransacking of the world's resources."

This book explains the creation of the European Union's Security and Defence Policy - to this day the most ambitious project of peacetime military integration. Whether hailed as a vital step in the integration of Europe or berated as a wasteful threat to U.S. power, European citizens are increasingly interested in the common defence policy. Today, "European Defence" is more popular than the European Union itself, even in Great Britain. Mérand addresses the fundamental challenge posed by military integration to the way we think about the state in the 21st Century. Looking back over the past 50 years, he shows how statesmen, diplomats and soldiers have converged towards Brussels as a "natural" solution to their concerns but also as something worth fighting over. The actors most closely associated to the formation of nation-states are now shaping a transgovernmental security and defence arena. As a result, defence policy is being denationalized. Exploring the complex relations between the state, the military, and citizenship in today's Europe, Mérand argues that European Defence is a symptom, but not a cause, of the transformation of the state. This book is an original contribution to the theory of European

integration. Drawing on the work of Pierre Bourdieu, Mérand develops a political sociology of international relations which seeks to bridge institutionalism and constructivism. His careful study of practices, social representations and power structures sheds new light on security and defence cooperation, but also on European cooperation more generally.
