Your Excel formulas cheat sheet: 22 tips for calculations ...

For example, $5 \times 6 =$. Step 1: Cut the number being multiplied by five in to half. This makes the number 6 to be number 3. Step 2: Add a zero to the number and you have your answer. In this case, the answer will be 30 . $5 \times 6 = 30$. When we need to multiply an odd number with 5, the formula is a bit different.

Math Tricks - Learn Speedy Math Tricks for Faster Calculations

1. Practise quickly - efficient calculation work is an important part of success in the test. 2. Use your calculator for everything. If you're allowed a calculator, use it for even the most basic drills. It's faster, more accurate and no one will know that you've previously typed something into your calculator. 3.

How to Use a Calculator | Tips, Tricks & Techniques for ...

Tips for Faster Calculations. 1. Squaring a number ending with 5. Multiply the rest of the number leaving the 5 in the unit digit with its successive number and write the result with 25 in the end. For e.g. 45^2 can be written as $(4 * (4+1)) 25 = (4*5) 25 = 2025$. 2.

6 Tricks for Faster Calculations in Competitive Exams

Simplify calculations into smaller, easier calculations. For example, if you are multiplying 125×15 , you can break this up into two component parts (factoring out, essentially). First, multiply 125×10 (1250). Second, divide that answer by 2 (625).

Ten Quick Calculator Tricks | PCWorld

First, as before, add the last digit (4) to the number itself (14) to get $18 = 14 + 4$. Next, again as before, square the last digit: $4^2 = 16$. You'd like to append the result (16) to the sum (18) getting 1816 which is clearly too large, for, say, $14 < 20$ so that $14^2 < 20^2 = 400$.

Fast Arithmetic Tips: Getting the Result Fast

a) $x^2 - 13x + 40 = 0$: Here, Product = Coefficient of $x^2 \times$ constant = $1 \times 40 = 40$. Add = $(-1) \times$ Coefficient of $x = (-1) \times (-13) = 13$. If the product is positive, the sign of the roots will be same and it will depend upon the sign of the Add. So in this case, the sign of the roots will be positive. Hence, $x = 8, 5$.

12 Fast Maths Tricks and Shortcuts - Bank Exams Today

Given below are some of the amazing tricks you will learn in ' the EasyCal Series of Faster Math Videos '. 1. Mental Addition Trick - You are not required to write down even a single step.
