Of Computers

Fundamentals of
Computer With
respect to class 5
Fundamentals of
Computer, a
computer is an
electronic device
that accepts the
data, stores data,
processes the data
and then produces
a result. It can
process the input
data to give the

Of Computers

desired output
according to the
instructions we
give. A computer is
made up of
Hardware and
Software devices.

Computer
Fundamentals
Tutorial. Computer
is an advanced
electronic device

that takes raw data as an input from the user and processes it under the control of a set of instructions (called program), produces a result (output), and saves it for future use. This tutorial explains the foundational concepts of

hardware, software, operating systems, peripherals, etc. along with how to get the most value and impact from computer technology.
