A new edition of the standard insurance text, revised to reflect changes that have occurred in the insurance industry and its environment since 1986. Incorporates changes wrought by the Risk Retention Act of 1986, the Tax Reform Act of 1986, the Revenue Act of 1987, and the Medicare Expansion Act of 1988. Covers legal changes, revisions in policy forms, and the introduction of new forms of insurance. As in previous editions, emphasis is on the insurance product and its use within a risk-management framework. The three sections cover the concept of risk, the nature of the insurance device, and the principles of risk management. Specific contracts are examined in detail in order to illustrate insurance principles in action. An appendix contains specimen copies of most major types of policies.

How librarians can be radical positive change agents in their communities, dedicated to learning and making a difference. This book offers a guide for librarians who see their profession as a chance to make a positive difference in their communities-librarians who recognize that it is no longer enough to stand behind a desk waiting to serve. R. David Lankes, author of The Atlas of New Librarianship, reminds librarians of their mission: to improve society by facilitating knowledge creation in their communities. In this book, he provides tools, arguments, resources, and ideas for fulfilling this mission. Librarians will be prepared to become radical positive change agents in their communities, and other readers will learn to understand libraries in a new way. The librarians of Ferguson, Missouri, famously became positive change agents in August 2014 when they opened library doors when schools were closed because of civil unrest after the shooting of an unarmed teen by police. Working with other local organizations, they provided children and their parents a space for learning, lunch, and peace. But other libraries serve other communities-students, faculty, scholars, law firms-in other ways. All libraries are about community, writes Lankes: that is just librarianship. In concise chapters, Lankes addresses the mission of libraries and explains what constitutes a library. He offers practical advice for librarian training; provides teaching notes for each chapter; and answers "Frequently Argued Questions" about the new librarianship.
