As it stands: Exhaust: Genie extractors going into two 2.5" pipes with twin cats, into one straight through muffler coming out to one 3" exhaust is \$1700 all up (stainless steel for the last part) . However, I will hunt around and buy the extractors, the cats, the muffler, and install the extractors myself.

Several versions of the 304ci engine were produced. Coded LV2 or A9L, they were used on the VK Group A SS. This series was painted black. During the life of the VL series, HSV released a Group A EFI version of the LV2 engine. From the VN series, Holden changed the engine designation to 5000 V8. Blocks were now drilled for the Chev bolt pattern.

Its more like 100lbs lighter then a cast iron V8. The LS1 weighs 3kg more then a Buick V6 3.8L (commodore engine) remove the bulky A/C compressor and P/S pump and you've savd near another 12-15kg. I had to run 4/6 cylinder suspension in the front of mine due to the weight being around the same as a 202.
