Integrated design is a comprehensive holistic approach to design which brings together specialisms usually considered separately. It attempts to take into consideration all the factors and modulations necessary to a decision making process. A few examples are the following: Design of a building which considers whole building design including architecture, structural engineering, passive solar building design and HVAC. The approach may also integrate building lifecycle management and a greater co

~~Integrated design—Wikipedia~~
This contemporary structure reflects New York glamour, while referencing the past through the combination of unique materials and treatments. The upper levels have floor to ceiling windows that are fastened with metal fixtures from the outside and then surrounded by green tinted tubes that the architects referred to as ‘bells’ due to their curved shape.
