Booth/Cleary Introduction to Corporate Finance is the only ground-up Canadian introductory finance textbook on the market. The text's authors, internationally renowned researchers, Laurence Booth (University of Toronto), and Sean Cleary (Queen's), provide students with a solid foundation in the theory and application of corporate finance topics within a uniquely Canadian context. The authors present complex material in an accessible and applied fashion, which gives students both a strong understanding and an interest in the subject. Booth/Cleary Introduction to Corporate Finance is the only book that will provide students with the skills they need to succeed not only in the undergraduate course, but in their future careers.

The authors wrote this text in response to the absence in the market of a text that would meet the needs of finance majors, but would still be accessible to all students. In many cases, as many as 80% of undergraduate corporate finance courses are filled with non-finance majors who are either intimidated by this course or who don't understand why they have to take the class (or both!). This text addresses the challenges all professors face: keeping students at varying degrees of ability and interest motivated and invested in the material.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a

sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.
