web page loaded in the browser and serves as an entry point into the web page's content, which is the DOM tree. The DOM tree includes elements such as `<body>` and `<table>`, among many others.

Read Free Javascript Documentation

Every function in JavaScript is a Function object. See Function for information on properties and methods of Function objects. To return a value other than the default, a function must have a return statement that specifies the value to return. A function without a return statement will return a default value.
