Check the air flow coming out of the vent at the outside of your home. If the air flow is weak then you could have a restriction in the exhaust air duct between the dryer and outside of your home.

Disconnect the flexible vent hose on the back of the dryer. Start the dryer on a timed and heated cycle.

The L2 leg of 240 volt power is below 30 volts. Check the house circuit breakers for the dryer and reset the L2 breaker if it's tripped. Unplug the dryer and check the power cord wire connections on the terminal block. Reconnect any loose wires or replace the power cord if it's damaged. Have an electrician check the 240 volt power supply for the dryer.
