Abstract · Objective: Lea symbols can be used for measuring visual acuity in childhood. Therefore, these symbols might be useful for early detection of amblyopia. We evaluated whether the visual acuity determined with Lea symbols (LS) corresponds to the visual acuity determined with the Landolt-C (LC).

[Lea symbols: visual acuity assessment and detection of ...](#)

METHODS Monocular habitual visual acuity was measured in a sample of 77 young children aged between 4 and 6 years using crowded Lea symbols charts with either flanking bars separated from the central symbol by 0.5 optotype width or flanking Lea optotypes separated from the central symbol by 1.0 optotype width.

[Assessment of Visual Acuity in Children Using Crowded Lea ...](#)

Important indications for using the Lea test are visual acuity assessment during pleoptic treatment and developmental diagnostics. Age related normal values of Lea symbol acuity up to 5 years, for example by the 10% quantiles of Table 2 ?, can be helpful to inform parents about the acuity development of their child. An interocular acuity difference more than one line, despite good cooperation, should arouse attention irrespective of age.

LEA SYMBOLS Flash Cards / 252700 LEA SYMBOLS® Flash Cards This set of flash cards was designed for testing distance visual acuity in children and adults who have difficulty with visual acuity charts, the Crowded Symbol Book Test, or the Single Symbol Book Test. Line sizes from 20/200 to 20/8 (6/60 to 6/2.4) equivalent, 0.10 to 2.50.

LEA SYMBOLS Flash Cards - Vision 2020 LVRC

achieved by using the 15 line (3 metre) Lea Symbols Chart (#250100). The Lea Symbols Chart consists of lines of four different symbols, arranged in combinations of five symbols per line. The symbols on each line are smaller than those on the line above. The Lea Symbols Chart distance visual acuity test has been shown to be successfully used in 76%

Distant vision testing (Lea Symbols Chart)

The non-translucent LEA SYMBOLS® chart #250250 is the original folding distance chart for preschool and kindergarten children and for assessment of vision of persons with difficulties in testing based on letters or numbers. It was designed in 1976 as one of the LEA Vision Test System tests to assess visual acuity.

LEA SYMBOLS Distance Visual Acuity Charts

The visual acuity values measured with single symbols are often several lines better than the line acuity values in persons with impaired vision and thus overestimate the quality of visual functioning. Single optotype line sizes from 20/200 to 20/8 (6/60 to 6/2.4) equivalent, 0.10 to 2.50.

LEA SYMBOLS SINGLE SYMBOL BOOK - Vision 2020 LVRC

The LEA SYMBOLS® have been chosen for several screening instruments, such as the INSTA-LINE by Good-Lite, the Massachusetts Visual Acuity Test and the VIP-test. These modifications try to make testing easier for the tester.

Visual Acuity Tests - Lea-Test Ltd.

The study, which compared visual acuity diagnoses from Lea symbols tests to those obtained via ophthalmological examination, revealed that the Lea symbols chart provided an accurate and sufficient assessment in 95.9% of the 149 preschool-age children tested. This suggests that Lea tests can be used confidently as an alternative to more costly and time-consuming pediatric tests of visual acuity.

Lea test - Wikipedia

It would seem that the best visual acuity measurement strategy for children over age 4 years would be to use a single surrounded letter optotype in a logMAR progression 18 or the Glasgow test. 8– 10 For the developmentally delayed and children unable to perform these letter tests, the use of the surrounded Lea symbols test is a reasonable alternative. 18 Another option would be the “O” test, which had a testability of 90% in a group of 62 mildly delayed 4–10 year old children. 19, 20 ...

Use of Lea symbols in young children

Literature review reveals 23 months as the earliest age at which LEA symbol could be used to visual acuity in a child. Hence, LEA symbol can be used to assess visual acuity in children older than 30

months of age . The present study compared visual acuity results obtained using the LEA symbol chart with that of Snellen E test chart in children without any eye or neurological problems of age group 36 months to 60 months.

Is LEA symbol better compared to Snellen chart for visual ...

Conclusions: The vision of nearly all 3- to 5-year-old children can be screened using either HOTV letters or Lea symbols. HOTV letters may be slightly more difficult than Lea symbols for 3- to 5-year-old children, with the largest difference between acuity results on the two tests occurring in 3-year-old children.

Preschool visual acuity screening with HOTV and Lea ...

Abstract. Purpose: The aim of this study was to assess the feasibility of a visual acuity (VA) test using the Lea Symbols 15?line folding distance chart and its diagnostic validity in detecting VA deficiency in preschool children.
