A laboratory information management system (LIMS), sometimes referred to as a laboratory information system (LIS) or laboratory management system (LMS), is a software-based solution with features that support a modern laboratory's operations. Key features include—but are not limited to—workflow and data tracking support, flexible architecture, and data exchange interfaces, which fully ...

Laboratory information management system - Wikipedia

A LIMS or Laboratory Information Management System is a software solution to address the data management, automation, and regulatory challenges of laboratories across the globe. As the name suggests, a LIMS is used to effectively manage laboratory samples and the associated data, thus standardizing operations by maintaining workflows, tests, and reporting procedures.
