There are some things you can only learn through doing and experiencing. Where theory is often taught in the ideal of a vacuum, the practical is learned through the reality of life. Practical knowledge can often lead to a deeper understanding of a concept through the act of doing and personal experience. Both of the above are important.

In fact, the theory/practice relation is the central concern of the book...There is a practical message in this book and it is addressed primarily to the social science community. The message is one which comes from a follower of Mannheim and Weber: social scientists must begin to conceive of the practical impact of their work from the very beginning, to make it part of the research itself.
