Perhaps the world's best known black and white landscape photographer, Ansel Adams is remembered for his beautiful photos of the American landscape. Adams was a master of black and white printing processes and pioneered the zone system, a method of analysing exposure to produce high quality black and white prints. Martin Chambi. www.martinchambi.com

~~Mastering the Art of Black and White Photography~~

Warning: This book is NOT for you if your primary interest is truly that of "mastering" digital black and white photography and printing. Any time a book title includes the words "mastering" or "ultimate" my smell-o-rama sensor automatically activates. Such sweeping and arrogant suggestions are always over-cooked.

~~Mastering Digital Black and White: A Photographer's Guide ...~~

Before digital photography the only way to work in black and white was to use black and white film. Thankfully, now it's much easier to work in black and white, just by switching your camera to Monochrome Mode (check your camera's manual if you are unsure how to do so, look for Picture Styles settings).

~~A Beginner's Guide to Doing Black and White Photography~~

Publisher: Guild of Master Craftsman Publications Ltd. ISBN: 9781781450871. Number of pages: 176. Dimensions: 248 x 158 mm. Mastering Black & White Photography is the definitive work on how to shoot black & white images on today's sophisticated digital SLR and compact digital cameras and smart phones.

~~New KelbyOne Course: Mastering Black and White Photography ...~~

Black and white photos tend to be stronger if they have a good amount of tonal contrast. A wide or high tonal contrast means that the photo contains areas with both black or very dark tones and extreme bright or white tones. The areas with black or white tones don't have to be large, but having them in your photo will make your image much more appealing compared to similar photos that lack either end of the tonal spectrum.

~~Master Black And White Contrast In Your Monochrome Photos~~

GOOD SUBJECTS FOR BLACK AND WHITE. When you take away colour you are taking away one of the primary ways the viewer can 'read' your image. Therefore there needs to be strong dimensions. Tone and Contrast – The photo subject will work best when it has a varied range of blacks, greys and whites.
