Best known for realistic and varied applications, an abundance of helpful pedagogy, and solid algebra review, the new edition of this text offers updated and new applications, and increased optional graphing calculator technology.

Mathematics with Applications by Margaret L. Lial

Description For freshman/sophomore, 2-semester or 2–3 quarter courses covering college algebra, finite mathematics, and/or calculus for students in business, economics, social sciences, or life sciences departments. This book presents the content and applications in an accessible manner while maintaining an appropriate level of rigor.

Lial, Hungerford & Holcomb, Mathematics with Applications ...

In Mathematics with Applications in the Management, Natural, and Social Sciences, students build a strong foundation with four chapters of algebra coverage before tackling finite mathematics and applied calculus topics. This natural progression from foundational to more advanced topics and from concrete examples to general rules and formulas is apparent throughout the text.
