Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

God has a more effective prayer life for you than you ever dreamed possible. Let this volume be your open door to wonderful answers to prayer. Here is your personal guide to a life of mighty prevailing prayer. Let this book speak to your heart, take you to your knees, and help you obtain prayer answers in difficult and resistant situations. Evangelist Leonard Ravenhill calls it an encyclopedia you will want to read and refer to again and again. The evangelical church is guilty of the sin of prayerlessness. Wesley Duewel has provided exactly what we need: a biblically sound exposition of prevailing prayer and practical suggestions for ways to prevail in prayer.

Want to clean a coffee pot in a flash? Unclog a sink with a simple homemade solution ? Do away with microwave odors? Banish those dust bunnies? That's why she has assembled a marvelous collection of miraculous cleaning tips and surprising shortcuts that get the job done quickly and well. Without a lot of fuss, you can solve hundreds of cleaning challenges in every room of your home: Remove dust, rust, gum, fingerprints, stains, odors, and mildew Clean leather and upholstery, carpets, windows, walls, floors, kitchen appliances, grills, and more Deal with damage from flooding and fire The queen count her pennies too -- with inexpensive, environmentally friendly cleaning concoctions and ingredients you might never expect, including Tea -- the wood cleaner you can drink! The amazing rust-removing power of the onion Lemon juice Vinegar Petroleum jelly Baking soda ...and the five cleaning products you should never be without! Let the Queen of Clean put an end to drudgery with her hints and solutions that get fabulous results -- fast!

The transformative effect of technological change on households and culture, seen from a macroeconomic perspective through simple economic models. In *Evolving Households*, Jeremy Greenwood argues that technological progress has had as significant an effect on households as it had on industry. Taking a macroeconomic perspective, Greenwood develops simple economic models to study such phenomena as the rise in married female labor force participation, changes in fertility rates, the decline in marriage, and increased longevity. These trends represent a dramatic transformation in everyday life, and they were made possible by advancements in technology. Greenwood also addresses how technological progress can cause social change. Greenwood shows, for example, how electricity and labor-saving appliances freed women from full-time household drudgery and enabled them to enter the labor market. He explains that fertility dropped when higher wages increased the opportunity cost of having children; he attributes the post-World War II baby boom to a combination of labor-saving household technology and advances in obstetrics and pediatrics. Marriage rates declined when single households became more economically feasible; people could be more discriminating in their choice of a mate. Technological progress also affects social and cultural norms. Innovation in contraception ushered in a sexual revolution. Labor-saving technological progress at home, together with mechanization in industry that led to an increase in the value of brain relative to brawn for jobs, fostered the advancement of women's rights in the workplace. Finally, Greenwood attributes increased longevity to advances in medical technology and rising living standards, and he examines healthcare spending, the development of new drugs, and the growing portion of life now spent in retirement.
