Global Report on Islamic Finance 2016-World Bank;Islamic Development Bank 2017-02-22 Income inequality has increased considerably in the aftermath of the financial crisis of 2007+“08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development ...

A second edition of Islamic Finance in the Global Economy, substantially revised and updated to take into account the recent developments in the field.

Information about Islamic finance in European countries is usually provided by professional-style reports, offering practical data on implementation of standardized products. However, precise developments about material legal provisions applicable to contracts and their actual legal regime are not often detailed. In order to fill this gap, 15 researchers from across Europe contributed to this project. They describe the state of actual Islamic finance in 10 European countries, as well as applicable EU law. By combining legal analysis with statistical description of existing practices and social demand, this book provides an exhaustive account of the current potential of Islamic finance in Europe.

Income inequality has increased considerably in the aftermath of the financial crisis of 2007+“08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development community is unanimous to tackle growing inequality and imbalance in the distribution of wealth, there is a difference of opinion as to the approaches to achieve this goal. This report presents a perspective from Islamic finance on how shared prosperity can be enhanced. The theoretical framework for economic development by Islamic economics and finance is based on four fundamental pillars: (i) an institutional framework and public policy oriented to the development objectives of Islam; (ii) prudent governance and accountable leadership; (iii) promotion of the economic and financial system based on risk sharing; and (iv) financial and social inclusion for all, promoting development, growth, and shared prosperity. There is evidence that Islamic finance is experiencing high growth with the banking sector leading the way. Several countries are working seriously towards developing standards, regulation and legal frameworks for the development of Islamic finance. However, there are a number of aspects where policy interventions or improvements in policy effectiveness are needed to develop Islamic finance to promote shared prosperity. Without the enabling environment, Islamic finance may not be able to attain the potential expected of it. With adequate policy interventions and enabling financial infrastructure, Islamic finance could become a catalyst for alleviating poverty and inclusive prosperity.

When it was originally published this volume was the first comprehensive survey of the experience of Islamic banking throughout the Muslim world in Turkey, Egypt, Kuwait, Jordan, Sudan, Iran, Pakistan and Saudi Arabia. Drawing comparisons between the countries in economic terms, it shows that the success of Islamic banks to a large extent reflects the immediate political environment. The complete Islamization of the financial systems of the more fundamentalist countries of Iran and Pakistan is compared with the divide between conventional interest-based systems and the new Islamic banks in Kuwait, Turkey, Egypt, Sudan and Jordan. Islamic Financial Markets explores both international Islamic finance and the national markets in which Islamic banks operate, raising for the first time the issue of competition in Islamic banking. It also looks to the future, to retail development and wholesale possibilities which seem to be the next step forward in Islamic finance. Setting the subject in historical, religious and economic perspective, the book offers a comprehensive survey of the successful adaptation of an ancient financial system to meet the requirements of modern commerce.

An authoritative introduction to efficiency and productivity analysis with applications in both the banking and finance industry In light of the recent global financial crisis, several studies have examined the efficiency of financial institutions. A number of open questions remain and this book reviews recent issues

and state-of-the-art techniques in the assessment of the efficiency and productivity of financial institutions. Written by an international team of experts, the first part of the book links efficiency with a variety of topics like Latin American banking, market discipline and governance, economics of scale, off-balance-sheet activities, productivity of foreign banks, mergers and acquisitions, and mutual fund ratings. The second part of the book compares existing techniques and state-of-the-art techniques in the bank efficiency literature, including among others, network data envelopment analysis and quantile regression. The book is suitable for academics and professionals as well as postgraduate research students working in banking and finance. Efficiency and Productivity Growth: Provides an authoritative introduction to efficiency and productivity analysis with applications in both the banking and mutual funds industry such as efficiency of Asian banks, cooperatives and not-for-profit credit associations. Explores contemporary research issues in the area of efficiency and productivity measurement in the financial sector. Evaluates the most suitable approaches to selecting inputs and outputs as well as selecting the most efficient techniques, such as parametric and non-parametric, to estimate the models.

"Green Deen" ("deen" means "way" in Arabic) is a call to devotion, prayer, and service. The author reveals how Islam's call to reflection specifically includes reflection on our relationship to the natural world and explains what Islam teaches about protecting the planet.

In June of 2010, IE Business School, with King Abdulaziz University, gathered in Madrid some of the world's foremost scholars, academics and practitioners of Islamic Economics and Finance. These highlights of the symposium and original articles specifically address the post-crisis application of this growing and relevant economic philosophy in Europe.

Jamaat-e-Islami Hind is the most influential Islamist organization in India today. Founded in 1941 by Syed Abul Ala Maududi with the aim of spreading Islamic values in the subcontinent, Jamaat and its young offshoot, the Student Islamic Movement of India or SIMI, have been watched closely by Indian security services since September 11. In particular, SIMI has been accused of being behind terrorist bombings. This book is the first in-depth examination of India's Jamaat-e-Islami and SIMI, exploring political Islam's complex relationship with democracy and providing a rare window into the Islamist trajectory in a Muslim-minority context. Irfan Ahmad conducted extensive ethnographic fieldwork at a school in the town of Aligarh, among student activists at Aligarh Muslim University, at a madrasa in Azamgarh, and during Jamaat's participation in elections in 2002. He deftly traces Jamaat's changing position in relation to India's secular democracy and the group's gradual ideological shift toward religious pluralism and tolerance. Ahmad demonstrates how the rise of militant Hindu nationalism since the 1980s--evident in the destruction of the Babri mosque and widespread violence against Muslims--led to SIMI's radicalization, its rejection of pluralism, and its call for jihad. Islamism and Democracy in India argues that when secular democracy is responsive to the traditions and aspirations of its Muslim citizens, Muslims in turn embrace pluralism and democracy. But when democracy becomes majoritarian and exclusionary, Muslims turn radical.

Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

Islamic Capital Markets: A Comparative Approach (2nd Edition) looks at the similarities and differences between Islamic capital markets and conventional capital markets. The book explains each topic from both the conventional and the Islamic perspective, offering a full understanding of Islamic capital markets, processes, and instruments. In addition to a full explanation of Islamic products, the book also ensures a holistic understanding of the dual markets within which Islamic capital markets operate. Ideal for both students and current practitioners, the second edition of the highly successful Islamic Capital Markets: A Comparative Approach fills a large gap in the current literature on the subject, featuring case studies from Malaysia, Indonesia, Europe, and the Middle East. One of the few comprehensive, dedicated guides to the subject available, the book offers comprehensive and in-depth insights on the topic of Islamic finance for students and professionals alike.
