XML Examples - W3Schools

Inspect the nodes. To process the XML data, each record has a node type that can be determined from the NodeType property. The Name and Value properties return the node name (the element and attribute names) and the node value (the node text) of the current node (or record). The NodeType enumeration determines the node type. The following sample code displays the name of the elements and the ...

How to read XML from a file by using Visual C#

The below sample example summarizes all these methods and creates a new xml document with some items in it such as elements, attributes, strings, comments and so on. See Listing 5-14. In this sample example, we create a new xml file c:\xmlWriterText.xml. In this sample example, We create a new xml file c:\xmlWriterTest.xml using XmlTextWriter:

Reading and Writing XML in C# - C# Corner

XML documents create a hierarchical structure looks like a tree so it is known as XML Tree that starts at "the root" and branches to "the leaves". Example of XML Document XML documents uses a self-describing and simple syntax: `<?xml version="1.0" encoding="ISO-8859-1"?>`

XML Example - javatpoint

For convenience, all the code examples use this sample XML file from MSDN. Figure 1 shows a representation of the schema underlying the file in a concise format (particularly when compared to reading the raw XSD file!), courtesy of Visual Studio's XML Schema Explorer. From the figure, you'll notice that the XML file is a catalog that ...
