Surgery
in periodontics is most apparent in patients with a high lip line. Current mucogingival procedures provide the surgeon with the capability to have a major role in the total treatment of complex restorative cases. Periodontal considerations must be included as an integral part of esthetic dentistry.

Mucogingival Surgery: The purpose of this surgery is to improve the esthetics of the gums, cover exposed root surfaces, or to provide more suitable gum tissue around the teeth. To accomplish this procedure, gum tissue may be transplanted from one area of the mouth to another. The roof of the mouth is frequently used
