In a series of different chapters Michael Baigent examines a number of enigmas surrounding such ancient mysteries as Atlantis and the Pyramids. He investigates such questions as whether there were ancient contacts between Europe and America, and whether a great catastrophe hit the planet around 10000 BC. And in the process he calls into question much of today's orthodoxy on such subjects.

The ancient Mysteries have long attracted the interest of scholars, an interest that goes back at least to the time of the Reformation. After a period of interest around the turn of the twentieth century, recent decades have seen an important study of Walter Burkert (1987). Yet his thematic approach makes it hard to see how the actual initiation into the Mysteries took place. To do precisely that is the aim of this book. It gives a 'thick description' of the major Mysteries, not only of the famous Eleusinian Mysteries, but also those located at the interface of Greece and Anatolia: the Mysteries of Samothrace, Imbros and Lemnos as well as those of the Corybants. It then proceeds to look at the Orphic-Bacchic Mysteries, which have become increasingly better understood due to the many discoveries of new texts in the recent times. Having looked at classical Greece we move on to the Roman Empire, where we study not only the lesser Mysteries, which we know especially from Pausanias, but also the new ones of Isis and Mithras. We conclude our book with a discussion of the possible influence of the Mysteries on emerging Christianity. Its detailed references and up-to-date bibliography will make this book indispensable for any scholar interested in the Mysteries and ancient religion, but also for those scholars who work on initiation or esoteric rituals, which were often inspired by the ancient Mysteries.

Cutting-edge thinkers on the origins of civilization, the Giza pyramids, pre-Columbian and early America, and the power of human consciousness • With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Giga, and others • Topics range from the origins of the Inca to the architecture of the Giza plateau to unified theories of physics and consciousness • Companion volume to Lost Knowledge of the Ancients As we pull back the curtain from the European version of history, we discover the vast depth of knowledge of our ancient ancestors--knowledge that not only dispels our image of them as primitive peoples but also corresponds with the forefront of modern science, philosophy, and spirituality. With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Giga, and other provocative, cutting-edge thinkers, this collection of essays commissioned by Graham Hancock, bestselling author of Fingerprints of the Gods, represents the latest, often controversial findings in alternative science, history, archaeology, and consciousness research. Covering topics ranging from the origins of the Inca and the secrets hidden in Vedic literature, to the architecture of the Giza pyramids and the Sphinx, to unified theories of physics and consciousness, this book shows how, by recovering our lost history, we too can experience the higher consciousness and advanced wisdom of the ancients.

The reader's choices will determine whether Ard, an orphan in a future, war-ravaged land, is able to save his twin sister, Toki, who was severely injured in a bomb blast.

Illustrated with one hundred and eighty-five color images and including a comprehensive series of essays by leading Chinese and European scholars, this volume summarizes current thinking about the archaeology and the history of the religious and social development of ancient China.

This is a new release of the original 1958 edition.

"A very balanced selection of sources for the study of the ancient so-called mystery religions, starting with Eleusis and ending with mysteries in Judaism and Christianity. . . . No other modern sourcebook exists in this field."—Kurt Rudolph
