Learn more about XML DB. Return to Oracle XMLDB Home. Oracle XML Developer Kit (XDK) is a set of components, tools and utilities in Java, C, and C++ bundled with Oracle Database 12c that eases the task of building and deploying XML-enabled applications with a commercial redistribution license. Unlike many shareware and trial XML components, Oracle XDK provides high performance XML support that has been proven in demanding enterprise production environments.

Oracle XML Developer Kit Home

SQL Developer is a development environment that simplifies the development and management of Oracle Database. It offers a complete end-to-end development of your PL/SQL applications, a worksheet for running queries and scripts, a DBA console for managing the database, a reports interface, a complete data modeling solution, intergrated Oracle REST Data Services, and a migration platform for moving your 3rd party databases to Oracle.
