Kate Klein-Morgan, a successful, thirty-year-old actress with a handsome if controlling manager husband, suddenly finds herself in charge of her own life when her husband leaves her for Sapphire Rose, an outrageously demanding fellow actress on her hit TV series, and questions her role in an industry that values money, fame, and beauty over everything else. A first novel. Reprint. 20,000 first printing.

With a New Preface by the Author Through personal journeys and historical inquiry, this PEN Literary Award finalist explores how America's still unfolding history and ideas of "race" have marked its people and the land. Sand and stone are Earth's fragmented memory. Each of us, too, is a landscape inscribed by memory and loss. One life-defining lesson Laurel Savoy learned as a young girl was this: the American land did not hate. As an educator and Earth historian, she has tracked the continent's past from the relics of deep time; but the paths of ancestors toward her—paths of free and enslaved Africans, colonists from Europe, and peoples indigenous to this land—lie largely eroded and lost. A provocative and powerful mosaic that ranges across a continent and across time, from twisted terrain within the San Andreas Fault zone to a South Carolina plantation, from national parks to burial grounds, from "Indian Territory" and the U.S.–Mexico Border to the U.S. capital, Trace grapples with a searing national history to reveal the often unvoiced presence of the past. In distinctive and illuminating prose that is attentive to the rhythms of language and landscapes, she weaves together human stories of migration, silence, and displacement, as epic as the continent they survey, with uplifted mountains, braided streams, and eroded canyons. Gifted with this manifold vision, and graced by a scientific and lyrical diligence, she delves through fragmented histories—natural, personal, cultural—to find shadowy outlines of other stories of place in America. "Every landscape is an accumulation," reads one epigraph. "Life must be lived amidst that which was made before." Courageously and masterfully, Laurel Savoy does so in this beautiful book: she lives there, making sense of this land and its troubled past, reconciling what it means to inhabit terrains of memory—and to be one.

One of Apple's Most Anticipated Books of Winter 2021 A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Catalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

Me? A leader? Okay, I did prove that there's more to Inside than we knew. That a whole world exists beyond this cube we live in. And finding that led to a major rebellion—between worker scrubs like me and the snobby uppers who rule our world. Make that ruled. Because of me, we're free. I thought that meant I was off the hook, and could go off on my own again—while still touching base with Riley, of course. He's the one upper I think I can trust. But then we learned that there's outside and then there is Outside. And something from Outside wants In.

From the *Outside In* examines the profound impact of World War II on American government. The book argues that the wartime and immediate postwar experiences of the 1940s transformed and redirected the policies and government institutions of the New Deal. In a work that makes significant contributions to the study of U.S. politics and history, Bartholomew Sparrow proposes a new model of the state and of "state-building." The author applies this model, which derives from the resource dependence perspective, to the historical record of four areas of public policy: social security, labor-management relations, public finance, and military procurement. This book is the first to use recently available archival materials documenting the consequences of World War II for the programs and political agendas of the welfare state. It is also the first to apply the resource dependency perspective to the U.S. federal government as a complex organization. The book will lead readers to reevaluate the impact of international factors on American political development, to reappraise the role of the New Deal in shaping the postwar federal government, and to reconsider the application of organizational theory to American government. From the *Outside In* will be of particular interest to political scientists, political sociologists, and historians. It will appeal to anyone with an interest in the comprehensive effects of the Second World War on domestic policies and U.S. government itself. Originally published in 1996. International Book Award, USA Book News Award and IPPY Award Winner! From Memorial Day until the student workers and tourists leave in the fall, the island community of Put-In-Bay, Ohio, thrives on alcohol, drugs, sexual experimentation, and any other means of forgetting responsibilities. To Brad Shepherd—recently forced out of his job as a junior high math teacher after the overdose death of a student—it's exactly the kind of place he's looking for. Allured by the comfort and acceptance of the hedonistic atmosphere, Brad trades his academic responsibilities and sense of obligation for a bouncer's flashy life and a pursuit of the endless summer. With Cinch Stevens, his new best friend and local drug dealer, at his side, Brad becomes lost in a haze of excess and instant gratification filled with romantic conquests, late-night excursions to special island hideaways, and a growing drug habit. Not even the hope from a blossoming relationship with Astrid, a bold and radiant Norwegian waitress, nor the mentoring from a mysterious mandolin player named Caldwell is enough to pull him out of his downward spiral. But as Labor Day approaches, the grim reality of his empty quest consumes him. With nowhere left to run or hide, Brad must accept that identity cannot be found or fabricated, but emerges from within when one has the courage to let go. A look at one man's belated coming of age that's equally funny, earnest, romantic, and lamenting, Doug Cooper's debut novel explores the modern search for responsibility and identity, showing through the eyes of Brad Shepherd how sometimes, we can only come to understand who we truly are by becoming the person we're not.
