Paper

Chromatography is a method used to separate mixtures into their different parts.

Paper

chromatography has been most commonly

Download Free Paper Chromato

graphy separate
pigments, dyes and
inks. To do paper
chromatography you
need paper with a lot
of cellulose fiber (fiber
found in wood) and
chromatography
solution, which is
usually made from a
mixture of water and
alcohol.

Paper

chromatography is useful in the field of forensic science, for

Download Free Paper Chromato

investigation of crime.

This is because this process can be successfully carried out even with very small quantities of material. Samples from crime scenes are collected to be analyzed and identified, using this technique. □ Used in DNA and RNA fingerprinting.
