Focus on Personal Finance is a brief, 14-chapter book, covering the critical topics in Personal Finance courses. This 4-color, paperback text is designed and written to appeal to a range of ages, life situations, and levels of financial literacy. A unique aspect of this text is its active approach. This text will not only get your students thinking about their current situation and financial goals, but also encourage them to put these in writing to use as a guide and revise over the course of their lives. New for this edition, sections are oriented around specific action-items for students. The more a student involves themselves in the assessments, exercises and worksheets provided, the more they will discover about their current habits and how to improve them for greater financial freedom. Students have many different financial goals, but none are more important than having a basic understanding of financial issues and peace of mind with regard to their decisions. A supplement for undergraduate and graduate Investments courses. See the decision-making process behind investments. The Psychology of Investing is the first text of its kind to delve into the fascinating subject of how psychology affects investing. Its unique coverage describes how investors actually behave, the reasons and causes of that behavior, why the behavior hurts their wealth, and what they can do about it. Features: What really moves the market: Understanding the psychological aspects. Traditional finance texts focus on developing the tools that investors use for calculating risk and return. The Psychology of Investing is one of the first texts to delve into how psychology affects investing rather than solely focusing on traditional financial theory. This text's material, however, does not replace traditional investment textbooks but complements them, helping students become better informed investors who understand what motivates the market. Keep learning consistent: Most of the chapters are organized in a similar succession. This approach adheres to following order: -A psychological bias is described and illustrated with everyday behavior -The effect of the bias on investment decisions is explained -Academic studies are used to show why investors need to remedy the problem Growing with the subject matter: Current and fresh information. Because data on investor psychology is rapidly increasing, the fifth edition contains many new additions to keep students up-to-date. The new Chapter 12: Psychology in the Mortgage Crisis describes the psychology involved in the mortgage industry and ensuing financial crisis. New sections and sub-sections include "Buying Back Stock Previously Sold", "Who Is Overconfident," "Nature or Nurture?", "Preferred Risk Habitat," "Market Impacts," "Language," and "Reference Point Adaptation."

If your personal financial knowledge is limited, you're probably not at fault. Personal Finance 101 isn't offered in our schools - not in high school and not even in the best colleges and graduate programs. It should be. (Of course, if it were, I wouldn't be able to write fun and useful books such as this - or maybe they'd use this book in the course!) People keep making the same common financial mistakes over and over - procrastinating and lack of planning, wasteful spending, falling prey to financial salespeople and pitches, failing to do sufficient research before making important financial decisions, and so on. This book can keep you from falling into the same traps and get you going on the best paths. As unfair as it may seem, numerous pitfalls await you when you seek help for your financial problems. The world is filled with biased and bad financial advice. As a practicing financial counselor and now as a writer, I constantly see and hear about the consequences of poor advice. Of course, every profession has bad apples, but too many of the people calling themselves "'financial planners'" have conflicts of interest and an inadequate competence level. All too often, financial advice ignores the big picture and focuses narrowly on investing. Because money is not an end in itself but a part of your whole life, this book helps connect your financial

goals and challenges to the rest of your life. You need a broad understanding of personal finance to include all areas of your financial life: spending, taxes, saving and investing, insurance, and planning for major goals like education, buying a home, and retirement.....You want to know the best places to go for your circumstances, so this book contains specific, tried-and-proven recommendations. I also suggest where to turn next if you need more information and help.
