Last year, Saudi Arabian Crown Prince Mohammed bin Salman announced plans to create a mega-city named Neom on the coast of the Red Sea. The plans for the city are ambitious indeed: at a cost of \$500 billion, Neom will be 17 times the size of London and 33 times the size of Manhattan. The city will cover 10,230-square-miles extending 285 miles along the coast of the Red Sea and run entirely on renewable energy.

A warm and surprisingly real-life biography, featuring never-before-seen photos, of one of rock's greatest talents: Prince. Neal Karlen was the only journalist Prince granted in-depth press interviews to for over a dozen years, from before Purple Rain to when the artist changed his name to an unpronounceable glyph. Karlen interviewed Prince for three Rolling Stone cover stories, wrote "3 Chains o' Gold," Prince's "rock video opera," as well as the star's last testament, which may be buried with Prince's will underneath Prince's vast and private compound, Paisley Park. According to Prince's former fiancée Susannah Melvoin, Karlen was "the only reporter who made Prince sound like what he really sounded like." Karlen quit writing about Prince a quarter-century before the mega-star died, but he never quit Prince, and the two remained friends for the last thirty-one years of the superstar's life.

Well before they met as writer and subject, Prince and Karlen knew each other as two of the gang of kids who biked around Minneapolis's mostly-segregated Northside. (They played basketball at the Dairy Queen next door to Karlen's grandparents, two blocks from the budding musician.) He asserts that Prince can't be understood without first understanding '70s Minneapolis, and that even Prince's best friends knew only 15 percent of him: that was all he was willing and able to give, no matter how much he cared for them. Going back to Prince Rogers Nelson's roots, especially his contradictory, often tortured, and sometimes violent relationship with his father, *This Thing Called Life* profoundly changes what we know about Prince, and explains him as no biography has: a superstar who calls in the middle of the night to talk, who loved *The Wire* and could quote from every episode of *The Office*, who frequented libraries and jammed spontaneously for local crowds (and fed everyone pancakes afterward), who was lonely but craved being alone. Readers will drive around Minneapolis with Prince in a convertible, talk about movies and music and life, and watch as he tries not to curse, instead dishing a healthy dose of "mamma jmmas."

My name is Kevin J. Phillips. The virus behind profiling comes in many forms, races, religions, sexual preferences, etc. I was a subject of profiling while driving, and my goal is to educate others on the problematic effects of profiling through this book, *Driving While Black: A Memoir of Profiling*.

This atlas comprehensively covers the use of basic ultrasound (US) scanning technologies to recognize both normal and pathologic states. It covers how to use US for soft tissue diagnosis, assessing cardiac function, pericardial effusion, tamponade, peripheral veins, gallbladder, bowel, kidneys, skull, sinuses, eye, pleura, scrotum and testes. *Atlas of Handheld Ultrasound* provides detailed clinically relevant examples of how US can be used to aid diagnosis across a wide range of medical disciplines. Chapters are formatted in a clear and easy-to-follow format, with a range of interactive material to aid the reader in developing a deep understanding of how to use and interpret US correctly. It therefore provides a critical resource on how to use the modality for both specialist and non-specialist practitioners.

Geographical listing of licensed day care facilities derived from lists "provided by state and regional licensing agencies." Entries give such information as name, address, telephone number, capacity, age range served, and contact person. Four volumes cover the northeastern, north central, western, and southern regions of the United States. Index.

In this volume, Marvin A. Sweeney builds upon his former work *Form and Intertextuality in Prophetic and Apocalyptic Literature* (FAT 45, 2005). He introduces further studies that take up several key issues, including the reading of prophetic books in their final literary form and the significance of textual versions for this reading. He also observes the intertextual relationships between the prophets and other works of biblical and post-biblical literature, and the reception of the prophetic books. Following an introduction that lays out methodological perspective, it includes the title essay for the volume, *Reading Prophetic Books*, as well as selections of papers devoted to Isaiah, Jeremiah in both its Masoretic and Septuagint forms, Ezekiel, individual books from the Twelve Prophets, and the reading of biblical texts in Qumran, Rabbinic, and Targumic literature.

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."
