Rehabilitation of any kind (i.e., physical, psychiatric, social, etc.) is an ecological approach ("person-environment fit") that fits the framework of the consequences of disease and the goals of health proposed by the World Health Organization (WHO) (i.e., classifying intervention effects in terms of their contribution to health, activity, and participation) [21].

"Psychosocial Rehabilitation: Approach of Choice for Those ...

PSR is a treatment approach designed to help improve the lives of people with disabilities. The goal of psychosocial rehabilitation is to teach emotional, cognitive, and social skills that help those diagnosed with mental illness live and work in their communities as independently as possible.

Psychosocial Rehabilitation: Benefits and Objectives

Psychosocial rehabilitation approaches are collaborative; person directed and individualized. They assist individuals in rediscovering skills and accessing the community resources needed to live successfully and with a self-identified quality of life. Accordingly, PSR approaches involve the client setting goals rather than goals being set by others.

PsyRehab.ca: What is Psychosocial Rehabilitation?

Psychosocial rehabilitation (also known as psychiatric rehabilitation) is a term used to refer to a range of non-pharmaceutical interventions designed to help a person recover from severe mental illness. Severe mental illness is mental illness that is both persistent and has a major impact on life functioning.

manual of psychosocial rehabilitation

Psychosocial rehabilitation (PSR) is currently considered one of the most promising intervention approaches in working with psychiatrically disabled adults. Unfortunately, there has also been a great deal of confusion about PSR. Over the last 30 years, hundreds of services and agencies have claimed they are using PSR.
