Requirements elicitation workshops are a great way to discover  
requirements. They're a key tool you can use to quickly elicit a  
majority of the requirements on your project. Unfortunately, many  
workshops don't get the anticipated value. A well run requirements  
workshop is engaging, valuable, and maybe even fun.

## **How to Run an Effective Requirements Elicitation Workshop**

Interviews are the most widely used elicitation technique in  
requirements engineering (RE). However, conducting a requirements  
elicitation interview is challenging. The mistakes made in design or  
conduct of the interviews can create problems in the later stages of  
requirements analysis. Empirical evidence about effective pedagogical  
approaches for training novices on conducting requirements ...

## **Teaching requirements elicitation interviews: an empirical ...**

Requirements elicitation is a complex process that consists of  
gathering, researching, defining, structuring, and clarifying a  
product's requirements. As a result of elicitation, a BA creates a set  
of project objectives. These objectives have to be understandable for  
each team member and represent all of the client's demands and needs.

To be successful, requirements workshops must include a recorder (or scribe) to record participants' input, and a facilitator to direct the discussion. Because participants' may also brainstorm together and listen to each others' input, they can provide immediate feedback and refinements to identified business needs, which can ensure a fast, effective elicitation of requirements.

## **An Overview of Requirements Elicitation**

Effective Requirements Elicitation Workshops. • Identify and meet with sponsor, decision makers and customers to gain insight into critical business needs, desired outcomes and constraints. • Identify pre-existing commitments that may impact project outcomes. Define Project Scope and Objectives. • Review legacy system documentation, data models, policies and regulations.

## **Requirements Elicitation Interviews and Workshops - Simply ...**

Elicitation and Collaboration Workshop. Business Analysis' main purpose is to enable changes in an organizational context, by defining needs and recommending solutions that deliver value to stakeholders. To accomplish that, business analysts must elicit information from stakeholders and/or other sources, that can help teams discover and understand the business need (problems, opportunities, expected benefits/value, capabilities/capabilities gap, context).
