If the roof curb will be mounted on a new building, it can be assembled at any convenient location and installed as soon as the roof support members are in place. As a general rule, the curb should be placed directly on the roof support members. Use tack welding or other suitable fastening method to secure the roof curb in place.

### Roof Curb —trane.com

Trane recommends that the roof curb be placed directly on the roof support members and welded into place. If the curb is mounted on the roof deck, additional support is necessary directly below the curb flanges to minimize vibration. Do not overlap counter flashing over the top of the roof curb.

Curb installation should be a part of the roof deck, not on top of insulation or roofing materials. Curbs should be a minimum of eight inches above the finished roof and factory-insulated to reduce condensation. Pressure-treated nailers should be provided by the curb manufacturer to receive roofing felts and eliminate noise transfer.
