The Document ID column displays the ID assigned to an item. Before using the Document ID feature in your content management system, you must first enable it for each site collection your documents are located in. Moving files with a Document ID In SharePoint the Document ID will normally move with the file.

Enable and configure unique Document IDs - SharePoint

During copy operations SharePoint Server 2010 assigns a new document ID. You can control this by setting a Boolean operator on the PersistID column. When a document ID is assigned it is exposed as metadata, and the server exposes a static URL so that the item to which the document ID is assigned can be recognized by its document ID.

Sharepoint 2010 Document Id Column Missing

Starting with SharePoint2010, the unique identifier of a document is no longer a headache to manage. To use Document IDs, just follow these simple steps: 1. Activate the Document ID Site collection feature. 2. Enter Site Actions>- Site collection features, then press the "Active" button next to the Document ID service to activate. 3.

How to Configure Unique Document IDs in SharePoint 2010 ...

The easiest option available for you to display Unique ID fields in SharePoint is the ID field (column). It is an out of the box field that exists in both SharePoint lists and libraries. The way it works is pretty simple. The first item you create or add in your list or library gets an ID of 1, the next one 2, 3, and so on. It auto-increments itself.

2 ways to create and display Unique ID fields in SharePoint

If you have a Custom List, you have to add (display) ID Column manually. Here is how you do it: If you are using a modern list, click +Add column > Show/hide columns. Click the checkbox next to the ID field, then hit Apply. You can also drag the column to the top if you want it to appear on the left side of the list.
